SUBJECT INDEX

AERODYNAMICS
Pan American Passenger Terminal at Idlewild Airport, Walter Prokosch, TR:129:313

AERO-SPACE TRANSPORT
Effect of Gradient on Jet Transport Runway Lengths, Gale Ahlborn and Robert Horonjeff, TR:129:381
Fueling System for Dulles International Airport, R. Dan Mahaney and D.M. Hosler, TR:129:881
Helicopter Performance and Heliport Design, Kenneth K. Wilde, TR:129:811
Recent Developments in Airport Lighting, D.M. Finch. TR:129:812

AIRCRAFT
Effect of Gradient on Jet Transport Runway Lengths, Gale Ahlborn and Robert Horonjeff, TR:129:381
Fueling System for Dulles International Airport, R. Dan Mahaney and D.M. Hosler, TR:129:881
Helicopter Performance and Heliport Design, Kenneth K. Wilde, TR:129:811
Photogrammetric Determination of Azimuths, Michael S. Tavenner and Paul B. Swenson, TR:129:921

AIR POLLUTION
Short-Term Air Pollution Studies, Frank A. Bell, Jr., TR:129:127

AIRPORTS
Effect of Gradient on Jet Transport Runway Lengths, Gale Ahlborn and Robert Horonjeff, TR:129:381
Fueling System for Dulles International Airport, R. Dan Mahaney and D.M. Hosler, TR:129:881
Helicopter Performance and Heliport Design, Kenneth K. Wilde, TR:129:881
Houston's Jetero Airport: Location and Configuration, Frank H. Newnam, Jr., TR:129:420
Pan American Passenger Terminal at Idlewild Airport, Walter Prokosch, TR:129:313
Recent Developments in Airport Lighting, D.M. Finch, TR:129:812

ALASKA
Cadastral Surveying in Alaska, Franklin K. Van Zandt, TR:129:884

ALUMINUM
Aluminum at Rocky Reach, Robert M. Peters, TR:129:476
Combination Coatings for Long-Term Corrosion Resistance, A.P. Shepard, TR:129:537
Galvanic Corrosion in Concrete Containing Calcium Chloride, T.E. Wright and I.H. Jenks, TR:129:829

ANALOGS
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Passive Analog Computers for Structural Analysis, Richard H. MacNeal, TR:129:825
Transient Response of Nonlinear Systems, Patrick F. Cunniff, TR:129:279

AQUIFERS
Mechanics of a Mathematical Ground-Water Model, Frank J. Trelease and Morton W. Bittinger, TR:129:675

ARCHES
Buckling of Circular Arches Under Nonuniform Pressure, G. Wempner and T. Ewbank, TR:129:424
Dynamic Nonlinear Response of Reinforced Concrete Arches, Vijay N. Gupchup and John M. Biggs, TR:129:826
Energy Criterion and Snap Buckling of Arches, A. Gjelsvik and S.R. Bodner, TR:129:281
Two-Hinged Arches--Digital Computer Analysis and Design, Ira Hooper and Ping C. Wang, TR:129:578

ARCTIC ENGINEERING
Adverse Weather--Dry Cold Conditions Effect on Engineering Design and Construction, Palmer W. Roberts, TR:129:187

AMERICAN SOCIETY OF CIVIL ENGINEERS

ASCE (General)
Professional Identification in ASCE, William H. Wisely, TR:129:158
Society Activities and Objectives, Report of the ASCE Task Committee on Society Objectives to Board of Direction, Burton G. Dwyre, Chmn, TR:129:206

ASCE (Public Relations)
The Public Image of the Civil Engineer, William H. Wisely, TR:129:122

ATMOSPHERE
Scintillation and the Surveyor, Lee D. Miller, TR:129:688

ATOMIC BLAST
Ground Displacements from Air-Blast Loading, Stanley D. Wilson and Earl A. Sibley, TR:129:60
Elastic Rayleigh Wave Motions Due to Nuclear Blasts, Melvin L. Baron and Ronald Check, TR:129:876

ATOMIC ENERGY
Civil Engineering for CVNPA Nuclear Power Plant, W.L. Klehm, TR:129:452
Free Fallout Shelter Design Data, Edward S. Plotkin, TR:129:539
Nuclear Power in the Antarctic Environment, Philip W. Brewer, TR:129:434
Nuclear Power Plants--Economies in Design and Construction, Committee for Construction of Nuclear Facilities of the Construction Division of ASCE, W.C. Siler, Chmn, TR:129:191

BEACHES
Effect of Berm of Wave Run-Up on Composite Beaches, John B. Herbich, Robert M. Sorensen, and Jack H. Willenbrock, TR:129:358
Equilibrium Characteristics of Sand Beaches, Peter S. Eagleson, Bard Glenne, and John A. Dracup, TR:129:235
New Land Worth $23 Million for Honolulu, Robert M. Belt, TR:129:581

BEAMS
Analysis of Folded Plates, David Yitzhaki and Max Reiss, TR:139:383
Beam Analogy for the Solution of Vierendeel Trusses, Bernardo Deschapelles, TR:129:684
Behavior of Prestressed Composite Beams, Peter G. Hoadley, TR:129:630
Deflection and Slope of Beams with Varying I, Otakar Ondra, TR:129:741
Design of Composite Beams for Highway Bridges, Konstantin Ketchek, TR:129:492
Dynamic Analysis of Inelastic Multi-Degree Systems, A.C. Heidebrecht, J.F. Fleming, and S.L. Lee, TR:129:843
Inelastic Lateral Buckling of Beams, Theodore V. Galambos, TR:129:657
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Model Studies of Beams Resting on a Silt Subgrade, Aleksandar B. Vesić and Wesley H. Johnson, TR:129:410
Solution of Nonlinear Shear Lag Problems, Natarajan Krishnamurthy and James Chinn, TR:129:695
Transverse Normal Stress in Beams, Jerome L. Sackman, TR:129:646

BEARING CAPACITY
Allowable Bearing Capacity of Initially Bent Piles, Bengt B. Broms TR:129:455
Bearing Capacity of Piles in Cohesionless Soils, Reymond L. Nordlund, TR:129:640
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Load Transfer in End-Bearing Steel H-Piles Elio D'Appolonia and James P. Romualdi, TR:129:363
Model Studies of Beams Resting on a Silt Subgrade, Aleksandar B. Vesic and Wesley H. Johnson, TR:129:410

BENTS
Applications of Topology in Structural Analysis, William R. Spillers, TR:129:393

BOLTS
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Eugene Chesson, Jr., and William H. Munse, TR:129:458
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Charles W. Lewitt, Eugene Chesson, Jr., and William H. Munse, TR:129:355
Riveted and Bolted Joints: Net Section Design, William H. Munse and Eugene Chesson, Jr., TR:129:297

BREAKWATERS
Model Tests of Coastal Protective Structures in USSR, Otakar W. Kabelac, TR:129:372
New Land Worth $23 Million for Honolulu, Robert M. Belt, TR:129:581
Sliding of Composite-Type Breakwaters by Breaking Waves, Shoshichiro Nagai, TR:129:370
Structures for Shore Protection, Jay V. Hall, Jr., TR:129:479

BRIDGE ABUTMENTS
An Analysis of Relief Bridge Scour, Emmett M. Laursen, TR:129:622

BRIDGES
All-Steel Abutments for Highway Bridges, John F. McDermott, TR:129:131
An Analysis of Relief Bridge Scour, Emmett M. Laursen, TR:129:622
Chesapeake Bay Bridge-Tunnel Project, a Series: Two Tunnels and Four Islands, Joseph Peraino, TR:129:563
Chesapeake Bay Bridge-Tunnel Project, a Series: Engineering Design, Leif J. Sverdrup, TR:129:561
Chesapeake Bay Bridge-Tunnel Project, a Series: Bridge and Trestle Construction, John W. Fowler, TR:129:565
Chesapeake Bay Bridge-Tunnel Survey, Percy Z. Michener and Earl O. Heaton, TR:129:219
Design of Composite Beams for Highway Bridges, Konstantin Ketchek, TR:129:492
Failure of Precast and Prestressed Bridge Girders, Donald E. Halsted, TR:129:507
Hydraulic Design of Small Bridges, Alfred R. Pagan, TR:129:579
Reconstructing a Covered Timber Bridge, Albert S. Salkowski, TR:129:531
The AWS Specifications for Welded Highway and Railway Bridges, LaMotte Grover, TR:129:573

BRIDGES, ARCH
Sault Ste. Marie International Bridge--Design and Construction, Carl H. Gronquist, TR:129:180

BRIDGES (General)
Scour at Bridge Piers, Luigi Stabilini and C.J. Posey, TR:129:184

BRIDGES, SUSPENSION
Buffeting of a Suspension Bridge by Storm Winds, Alan Garnett Davenport, TR:129:306

BUCKLING
Analysis and Design of Struts with Tension Ties, Kuang-Han Chu and Sigmon S. Berge, TR:129:377
Buckling for Stepped Columns with Rotated Ends, Robert E. Sennett, III, and Sidney Shore, TR:129:50
Buckling of Circular Arches Under Nonuniform Pressure, G. Wempner and T. Ewbank, TR:129:424
Buckling of Thin Shells Under External Pressure, Anthony E. Armenàkas and George Herrmann, TR:129:347
Creep Buckling of Reinforced Concrete Columns, Samuel Mauch and Myle J. Holley, TR:129:903

BUCKLING Continued
Energy Criterion and Snap Buckling of Arches, A. Gjelsvik and S.R. Bodner, TR:129:281
Nonsymmetrical Snap Buckling of Spherical Caps, A. Gjelsvik and S.R. Bodner, TR:129:78
Plastic Buckling Pressure for Spherical Shells, Myron E. Lunchick, TR:129:638
Stability of Equilateral Triangular Plates, William A. Bradley, TR:129:416
Stability of Frames Under Primary Bending Moments, Le-Wu Lu, TR:129:913
Steel Column Design for Multistory Rigid Frames, Charles F. Beck and Max Zar, TR:129:729
Structural Synthesis with Buckling Constraints, Lucien A. Schmit, Jr., and William M. Morrow, TR:129:252
Ultimate Load of H-Columns Under Biaxial Bending, Charles Birnstiel and James Michalos, TR:129:379

BUILDINGS
Analysis of Rigid Frames by Difference Equations, Hsien-San Tsang, TR:129:75
A New Project for Mexico City, Romeo Enriquez R. and Alejandro Fierro, TR:129:216
Baltimore Revitalizes Downtown Area, Elwood S. Deakyne, TR:129:503
Building Height Tripled by New Thinking Plus New Steel, J.L. Kellerman, TR:129:135
Detroit's Automated Post Office--Nation's Second Largest, Victor F. Leabu, TR:129:137
Effects of Tornados on Buildings, Frank E. Burkett, TR:129:120
Engineers as Real Estate Developers, Paul Rogers and George A. Kennedy, TR:129:201
GE's World's Fair Pavilion, Stanley A. Graves, TR:129:498
High-Rise Concrete Buildings, David Bloom, TR:129:505
Natural Periods of Vibration of Buildings, G. W. Housner and A.G. Brady, TR:129:894
New York World's Fair Building Trends, William Whipple, Jr., TR:129:182
Parking Garage Extended to Meet Growth of Downtown Houston, Arnoldo Longoria, TR:129:156
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837
Timber Piles Reused in Place, Eugene A. Dubin, TR:129:203

CABLES
Boundary Flow Along a Circular Cylinder, Robert O. Reid and Basil W. Wilson, TR:129:334

CANALS
Clinton's Ditch, Cement, and Canvass White, Albert C. Jensen, TR:129:521
Sediment-Transport Capability in Erodible Channels, Shieh-Wen Mao and Leonard Rice, TR:129:792
Seepage Meters in Seepage and Recharge Studies, Herman Bouwer and R.C. Rice, TR:129:243

CAVITATION
Cavitation in Hydraulic Structures: Problems Created by Cavitation Phenomena, Fred R. Brown, TR:129:874
Cavitation in Hydraulic Structures: Scale Effects Involved in Cavitation Experiments, James M. Robertson, TR:129:85
Mechanics of Cavitation, Virgil E. Johnson, Jr., TR:129:662

CEMENT
Clinton's Ditch, Cement, and Canvass White, Albert C. Jensen, TR:129:521
Compacting a Dam Foundation by Blasting, Charles E. Hall, TR:129:823
Granulometric Properties of Cement Stabilized Sands, Bruce G. Hutchinson, TR:129:255

CHANNELS
Channel Stability in Undisturbed Cohesive Soils, Elliott M. Flaxman, TR:129:385
Compacting a Dam Foundation by Blasting, Charles E. Hall, TR:129:823
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Flood Waves in Prismatic Channels, Francis M. Henderson, TR:129:738
Flow of Clay Water Suspensions, Charles D.D. Howard, TR:129:859
Flow Retardance by Channel Weeds and Their Control, John C. Stephens, R.D. Blackburn, D. E. Seaman, and L. W. Weldon, TR:129:724
Manning's Formula for Wide Trapezoidal Channels, C.J. Posey and S.N. Pagay, TR:129:151
Sediment-Transport Capability in Erodible Channels, Shieh-Wen Mao and Leonard Rice, TR:129:792
Side-Channel Spillway Design, Harold S. Farney and Adolfs Markus, TR:129:39
Solving the Equations of Uniform Flow, William F. Pickard, TR:129:769

CHIMNEYS
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601
An Appraisal of Zoning as a Tool of City Planning, Richard F. Babcock, TR:129:636

CITY PLANNING
Baltimore Revitalizes Downtown Area, Elwood S. Deakyne, TR:129:503
Distribution of Work Trips in Toronto, Karl Heinz Dieter, TR:129:32
Interdependence of Transportation and City Planning, William S. Pollard, Jr., TR:129:891
Predicting the Modal Split in Pittsburgh, Louis E. Keefer, TR:129:745
The Engineer's Role in Planning Urban Renewal, James W. Follin, TR:129:596
Transportation Planning Re-examinated, William S. Pollard, Jr., TR:129:863

CIVIL DEFENSE
Free Fallout Shelter Design Data, Edward S. Plotkin, TR:129:539

CLAY
Expansion of a Cavity in a Saturated Clay Medium, B. Ladanyi, TR:129:619
Experience with Canadian Varved Clays, Victor Milligan, L.G. Soderman, and A. Rutka, TR:129:605
Flexibility of Clay and Cracking of Earth Dams, Gerald A. Leonards and Jagdish Narain, TR:129:767

CLAY Continued
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607
Study of Failure Envelope of Soils, T.H. Wu, A.K. Loh and L.E. Malvern, TR:129:388

CLAYS
Compression of Partially Saturated Cohesive Soils, Yoshiaki Yoshimi and Jorj O. Osterberg, TR:129:432
Flow of Clay Water Suspensions, Charles D.D. Howard, TR:129:859

CLIMATE
Climate, Population, and Water Demand, Gulam M. Quraishi, TR:129:314

COASTAL ENGINEERING
Model Tests of Coastal Protective Structures in USSR, Otakar W. Kabelac, TR:129:372
Effect of Berm on Wave Run-Up on Composite Beaches, John B. Herbich, Robert M. Sorensen, and Jack H. Willenbrock, TR:129:358
Equilibrium Characteristics of Sand Beaches, Peter S. Eagleson, Bard Glenne, and John A. Dracup, TR:129:235
New Land Worth $23 Million for Honolulu, Robert M. Belt, TR:129:581
Structures for Shore Protection, Jay V. Hall, Jr., TR:129:479

COEFFICIENTS
Allowable Bearing Capacity of Initially Bent Piles, Bengt B. Broms, TR:129:455
Dispersion-Permeability Correlation in Porous Media, Donald R.R. Harleman, P.F. Mehlhorn, and Ralph R. Rumer, Jr., TR:129:58
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882

COFFERDAMS
Mehldahl Locks and Dam, William F. McCraw, Jr., TR:129:527
Optimum Solution Techniques for Finite-Difference Equations, Richard N. White, TR:129:444
Concrete Cutoff Wall Drilled Down 250 Ft, I.V. Galbiati, TR:129:589
Kariba Left Bank Cofferdam, Jean J. Martin, TR:129:831

COLUMNS
Analysis and Design of Struts with Tension Ties, Kuang-Han Chu and Sigmon S. Berge, TR:129:377
Buckling for Stepped Columns with Rotated Ends, Robert E. Sennett, III, and Sidney Shore, TR:129:50
Columns in Planar Continous Structures, Morris Ojalvo and Victor Levi, TR:129:240
Creep Buckling of Reinforced Concrete Columns, Samuel Mauch and Myle J. Holley, TR:129:903
Dynamic Bending of Elastic Columns, Herbert R. Bailey, TR:129:467
Dynamic Response of Elastic-Viscous-Plastic Columns, Cheng Y. Yang, Robert J. Hansen, and Kenneth F. Reinschmidt, TR:129:83
Elastic Strength of Tapered Columns, Charles M. Fogel and Robert L. Ketter, TR:129:21
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761
Stability of Frames Under Primary Bending Moments, Le-Wu Lu, TR:129:913
Steel Column Design for Multistory Rigid Frames, Charles F. Beck and Max Zar, TR:129:729
Ultimate Load of H-Columns Under Biaxial Bending, Charles Birnstiel and James Michalos, TR:129:379

COMPACTION
Compression of Partially Saturated Cohesive Soils, Yoshiaki Yoshimi and Jorj O. Osterberg, TR:129:432
Effective Stress Theory of Soil Compaction, Roy E. Olson, TR:129:293
Properties of Roadbeds, Ira B. Mullis, TR:129:755

COMPOSITE DESIGN
Behavior of Prestressed Composite Beams, Peter G. Hoadley, TR:129:630

COMPUTATION
Electronic Surveys in New Brunswick, Gottfried Konecny and Willis F. Roberts, TR:129:855

COMPUTATION AND COMPUTERS
Stability of Space Frames by Computer Analysis, John D. Renton, TR:129:225

COMPUTERS
Analysis of Large Movable Structures, Herbert Rothman and Philip Mason, TR:129:889
Analysis of Nonlinear Structures, John E. Goldberg and Ralph M. Richard, TR:129:425
Analytical Methods in Transportation: Systems Analysis for Arterial Street Operation, Charles Pinnell and Gilbert T. Satterly, TR:129:846
Applications of Topology in Structural Analysis, William R. Spillers, TR:129:393
Computer Study of Dynamic Behavior of Piling, Charles H. Samson, Jr., Teddy J. Hirsch, and Lee L. Lowery, Jr., TR:129:764
Computers Provide a Shortcut in Earthwork Estimates for Dam Design, Robert S. Gooch, TR:129:543
Creep Buckling of Reinforced Concrete Columns, Samuel Mauch and Myle J. Holley, TR:129:903
Dynamic Analysis of Inelastic Multi-Degree Systems, A.C. Heidebrecht, J.F. Fleming, and S.L. Lee, TR:129:843
Dynamic Bending of Elastic Columns, Herbert R. Bailey, TR:129:467
Dynamic Flexibility Matrix Analysis of Frames, Kenneth W. Levien and Billy J. Hartz, TR:129:890
Dynamic Nonlinear Response of Reinforced Concrete Arches, Vijay N. Gupchup and John M. Biggs, TR:129:826
Dynamics of a Large Steerable Radio Telescope Antenna, William Weaver, Jr., and Thomas R. Kane, TR:129:686
Electronic Computers in Watershed Research, L.L. Kelly, TR:129:634
Engineering Approach to Information Processing, Walter M. Carlson, TR:129:430

COMPUTERS Continued
Impact of the Computer on the Young Engineer, Elmer K. Timby, TR:129:4
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761
Large Capacity Multistory Frame Analysis Programs, Ray W. Clough, Edward L. Wilson, and Ian P. King, TR:129:865
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Man-Machine Communications in Civil Engineering, Charles L. Miller, TR:129:919
Matrix Solution of Force Relaxation Method, Chuan C. Feng, TR:129:632
Mechanics of a Mathematical Ground-Water Model, Frank J. Trelease and Morton W. Bittinger, TR:129:675
Natural Periods of Vibration of Buildings, G. W. Housner and A.G. Brady, TR:129:894
Network Analogy for Linear Structures, William R. Spillers, TR:129:804
Network-Topological Formulation of Structural Analysis, Steven J. Fenves and Franklin H. Branin, Jr., TR:129:699
Optimum Solution Techniques for Finite-Difference Equations, Richard N. White, TR:129:444
Orthonormal Equations for Surveying Adjustment, Hsuan Loh Su, TR:129:879
Passive Analog Computers for Structural Analysis, Richard H. MacNeal, TR:129:825
Plane Stress Analysis, Caleb W. McCormick, TR:129:856
Project Yield by a Probability Method, W. Don Maughan and Ray Y. Kawano, TR:129:734
Re-entry Vehicle Optimization and Synthesis Program, T.E. Hess, James C. Bailey, and H.J. Most, TR:129:887
Reliability Framework for Structural Design, Howard L. Leve, TR:129:771
Simplified Formulation of Stiffness Matrices, Peter M. Wright, TR:129:840
Solution of Nonlinear Shear Lag Problems, Natarajan Krishnamurthy and James Chinn, TR:129:695
Solving the Equations of Uniform Flow, William F. Pickard, TR:129:769
Space Frame Analysis by Matrices and Computer, Kurt Eisemann, Lin Woo, and Saul Namyet, TR:129:609
Steel Column Design for Multistory Rigid Frames, Charles F. Beck and Max Zar, TR:129:729
Streamflow Records by Digital Computer, Edward J. Kennedy, TR:129:818
Structural Analysis of Solids, Robert J. Melosh, TR:129:397
Structural Synthesis and Design Parameter Hierarchy, Lucien A. Schmit, Jr., and Robert H. Mallett, TR:129:441
Transient Response of Nonlinear Systems, Patrick F. Cunniff, TR:129:279
Transportation Planning Re-examined, William S. Pollard, Jr., TR:129:863
Two-Hinged Arches--Digital Computer Analysis and Design, Ira Hooper and Ping C. Wang, TR:129:578
Use of Critical Path Techniques, Charles W. Zahler, TR:129:436
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601

COMPUTING
Flexibility Method of Coupling Redundant Complex Structures, Claus J. Meissner and Robert S. Levy, TR:129:901

CONCRETE
Analysis of Prestressed Cylindrical Shell Roofs, Ryszard Dabrowski, TR:129:673
Concrete Cutoff Wall Drilled Down 250 Ft, I.V. Galbiati, TR:129:589
Concrete for Marinas, Edward P. Sellner, TR:129:482
Dynamic Nonlinear Response of Reinforced Concrete Arches, Vijay N. Gupchup and John M. Biggs, TR:129:826
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Fracture of Plain Concrete, Joseph Glucklich, TR:129:896
Galvanic Corrosion in Concrete Containing Calcium Chloride, T.E. Wright and I.H. Jenks, TR:129:829
High-Rise Concrete Buildings, David Bloom, TR:129:505
Installation Problems with Cast-in-Place Concrete Piles, Michael Praszker, TR:129:144
Long Concrete Cylinder Piles for Deep-Water Platform, Gerald A. O'Connor, TR:129:165
Manning Roughness Factors for Concrete Sewer Pipe, Israel W. Santry, TR:129:637
Maximum Size of Aggregate Affects Strength of Concrete, Elmo C. Higginson, George B. Wallace, and E.L. Ore, TR:129:549
Mechanics of Crack Arrest in Concrete, James P. Romualdi and Gordon B. Batson, TR:129:918
Skopje Earthquake Damage, Walter E. Kunze, Mark Fintel, and James E. Amrhein, TR:129:570
Statistical Evaluation of Concrete Strength Tests, Philip D. Cady, TR:129:910
Vermiculite Insulating Concrete, Clayford T. Grimm, TR:129:553
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601

CONCRETE (General)
Test of Concrete Pavements on Crushed Stone, L.D. Childs and Joe W. Kapernick, TR:129:777

CONCRETE, PRECAST
Failure of Precast and Prestressed Bridge Girders, Donald E. Halsted, TR:129:507
Interceptor Sewer Built in a Lake, William J. Dorner and Walter J. Bushnell, TR:129:148

CONCRETE, PRESTRESSED
Behavior of Prestressed Composite Beams, Peter G. Hoadley, TR:129:630
Computer Study of Dynamic Behavior of Piling, Charles H. Samson, Jr., Teddy J. Hirsch, and Lee L. Lowery, Jr., TR:129:764
Failure of Precast and Prestressed Bridge Girders, Donald E. Halsted, TR:129:507
Pretest Tiebacks and Drilled-In Caissons, Robert E. White, TR:129:174

CONCRETE, REINFORCED
Civil Engineering for CVNPA Nuclear Power Plant, W.L. Klehm, TR:129:452
Creep Buckling of Reinforced Concrete Columns, Samuel Mauch and Myle J. Holley, TR:129:903
Engineers as Real Estate Developers, Paul Rogers and George A. Kennedy, TR:129:201

CONTRACTS
Who Pays for the Unexpected in Construction? TR:129:514

CONDUITS
Experimental Apparatus Studies Sediment Transport in Closed Conduits, Hans A. Einstein and Walter H. Graf, TR:129:585
Turbulent Flow in Rectangular Ducts, Hans J. Leutheusser, TR:129:659

CONSTRUCTION
Behavior of Volcanic Soils in Highway Construction, Jorge Ernesto Erdmenger, TR:129:29
Cost of Operating a Field Construction Office, John D. Bristor, TR:129:797
Deep Injection Disposal Well for Liquid Toxic Waste, O.E. Mechem and J.H. Garrett, TR:129:800
Densification of Soils by Explosive Vibrations, Byron J. Prugh, TR:129:663
Field Estimating and Cost Control, John R. Ice, TR:129:598
Flexible Pavement for a New Hampshire Interstate Route, Daniel S. Bailey, Jr., TR:129:113
International Credit Unlocks Andean Hydro, Stanford P. McCasland, TR:129:109
Kariba Left Bank Cofferdam, Jean J. Martin, TR:129:831
Machine Tunneling in Tasmania, Henry H. Thomas, TR:129:150
New Techniques for Backfilling Shafts, J.D. Davenport and John C. King, TR:129:541
Placing Earth Fill for Colombia's Troneras Dam, Chung Y. Li, TR:129:133
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837
Russian Construction Boom, James K. Carr, TR:129:140
St. Anthony Falls Navigation Project, Francis E. Mullen, TR:129:52
Statistical Evaluation of Concrete Strength Tests, Philip D. Cady, TR:129:910
The Road Show--A Product of American Enterprise, H.A. Radzikowski, TR:129:124
Tunnel Driving on Three Contracts for Relocation of Western Pacific Railroad Above Oroville Dam in California, Harold E. Russell, TR:129:125
Use of Critical Path Techniques, Charles W. Zahler, TR:129:436
Use of Nylon in Hydraulic Engineering, Ir. J.P.A. Van Lookeren Campagne, TR:129:105
What Comes Before Construction of a Dam? Hugh B. Montgomery, TR:129:168
Who Pays for the Unexpected in Construction? TR:129:514

CORROSION
Civil Engineering for CVNPA Nuclear Power Plant, W.L. Klehm, TR:129:452
Combination Coatings for Long-Term Corrosion Resistance, A.P. Shepard, TR:129:537

COSTS
Cost of Operating a Field Construction Office, John D. Bristor, TR:129:797
Electronic Surveys in New Brunswick, Gottfried Konecny and Willis F. Roberts, TR:129:855
Field Estimating and Cost Control, John R. Ice, TR:129:598
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:637

COUPLING
Flexibility Method of Coupling Redundant Complex Structures, Claus J. Meissner and Robert S. Levy, TR:129:901

CRACKS
Fracture of Plain Concrete, Joseph Glucklich, TR:129:896

CRITICAL PATH METHOD
Use of Critical Path Techniques, Charles W. Zahler, TR:129:436

CULVERTS
Hydraulic Design of Small Bridges, Alfred R. Pagan, TR:129:579
Length of Culverts, K.R. Patel, TR:129:309

CURVES
Dead Load Stresses and Instability of Slopes, Lawrence E. Goodman and C.B. Brown, TR:129:89
Effect of Berm on Wave Run-Up on Composite Beaches, John B. Herbich, Robert M. Sorensen and Jack H. Willenbrock, TR:129:358
Extension of Rating Curves by Field Surveys, Walter T. Sittner, TR:129:286
Transient Response of Nonlinear Systems, Patrick F. Cunniff, TR:129:279
Unique Consumptive Use Curve Related to Irrigation Practice, Vaughn E. Hansen, TR:129:654
Vertical Curve Plotting, James W.O. Baker, TR:129:774

DAMAGE
Risk Criteria, Leon E. Borgman, TR:129:751

DAMS
Aluminum at Rocky Reach, Robert M. Peters, TR:129:476
Computers Provide a Shortcut in Earthwork Estimates for Dam Design, Robert S. Gooch, TR:129:543
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Meldahl Locks and Dam, William F. McCraw, Jr., TR:129:527
Oahe Dam: Influence of Shale on Oahe Power Structures Design, Edward A. Johns, R.G. Burnett, and C.L. Craig, TR:129:249
Seepage Under Dams, Hammad Y. Hammad, TR:129:263
Placing Earth Fill for Colombia's Troneras Dam, Chung Y. Li, TR:129:133
Taum Sauk Pumped-Storage Power Project, Edward A. Rudulph, TR:129:111

DAMS Continued
What Comes Before Construction of a Dam? Hugh B. Montgomery, TR:129:168

DAMS, EARTHFILL
Earthquake Resistance of Sloping Core Dams, H. Bolton Seed and Ray W. Clough, TR:129:327
Flexibility of Clay and Cracking of Earth Dams, Gerald A. Leonards and Jagdish Narain, TR:129:767
Innovations at Wanapum Dam, Uno V. Engstrom, TR:129:583
Pomme de Terre Dam of Earth and Rockfill, Louis G. Elser and Dean E. Schuster, TR:129:246

DAMS (General)
Compacting a Dam Foundation by Blasting, Charles E. Hall, TR:129:823
John Day Lock and Dam: Planning and Site Selection, Glenn H. Von Gunten and John F. Bruce, TR:129:716
Soil-Cement as Slope Protection for Earth Dams, Wesley G. Holtz and Fred C. Walker, TR:129:713

DAMS, ROCKFILL
Earthquake Resistance of Sloping Core Dams, H. Bolton Seed and Ray W. Clough, TR:129:327
Pomme de Terre Dam of Earth and Rockfill, Louis G. Elser and Dean E. Schuster, TR:129:246

DEFLECTION
Allowable Bearing Capacity of Initially Bent Piles, Bengt B. Broms, TR:129:455
Analysis of Rigid Frames by Difference Equations, Hsien-San Tsang, TR:129:75
Deflection and Slope of Beams with Varying I, Otakar Ondra, TR:129:741
Dynamic Bending of Elastic Columns, Herbert R. Bailey, TR:129:467
Flexibility Method of Coupling Redundant Complex Structures, Claus J. Meissner and Robert S. Levy, TR:129:901
Stresses in a Pressurized Box, H.D. Conway, TR:129:361

DEFLECTIONS
Large Deflections of Plates on Elastic Foundations, S.N. Sinha, TR:129:875
Thermoelasticity of Heterogeneous Aelotropic Plates, Yehuda Stavsky, TR:129:737

DENSITY
Effective Stress Theory of Soil Compaction, Roy E. Olson, TR:129:293

DISPERSION
Dispersion-Permeability Correlation in Porous Media, Donald R.F. Harleman, P.F. Mehlhorn, and Ralph R. Rumer, Jr., TR:129:58
Fluorescent Tracers for Dispersion Measurements, Donald L. Feuerstein and Robert E. Selleck, TR:129:438
Intruded Salt-Water Wedge in Porous Media, Ralph R. Rumer, Jr., and Donald R.F. Harleman, TR:129:871

DISPERSIONS
Dye Dispersion Studies, Alex N. Diachishin, TR:129:851

DOCKS
Dynamic Response and Stability of Piers on Piles, James Michalos, TR:129:27

DOMES
Metallic Dome-Structure Systems, Shu-t'ien Li, TR:129:401

DRAINAGE
Design of Metal Pipe for Irrigation Structures, Darrell N. Blake, TR:129:732
Design of Tile Drainage for Falling Water Tables, Jan van Schilfgaarde, TR:129:815
Economics of Urban Drainage Design, William J. Bauer, TR:129:335
Electronic Computers in Watershed Research, L.L. Kelly, TR:129:634
Flow Retardance by Channel Weeds and Their Control, John C. Stephens, R.D. Blackburn, D.E. Seaman, and L.W. Weldon, TR:129:724
Houston's Jetero Airport: Location and Configuration, Frank H. Newnam, Jr., TR:129:420
Hydraulic Roughness of Corrugated Piles, Charles R. Neill, TR:129:340
Length of Culverts, K.R. Patel, TR:129:309
New Machine Lays Plastic Drains, James L. Fouss, TR:129:170
Quality and Significance of Irrigation Return Flow, Robert O. Sylvester and Robert W. Seabloom, TR:129:460

DRAINS
Design of Tile Drainage for Falling Water Tables, Jan van Schilfgaarde, TR:129:815

DRILLING
Deep Injection Disposal Well for Liquid Toxic Waste, O.E. Mechem and J.H. Garrett, TR:129:800

DROUGHTS
Atmospheric Moisture-Precipitation Relations, Floyd A. Huff, TR:129:757

DYNAMICS
Dynamic Response of Lattice-Type Structures, Bruce S. Berger and Sidney Shore, TR:129:96

EARTH-FILL
Placing Earth Fill for Colombia's Troneras Dam, Chung Y. Li, TR:129:133

EARTH PRESSURE
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607

EARTHQUAKES
Distribution of Structural Response to Earthquakes, Emilio Rosenblueth and Jorge I. Bustamante, TR:129:413
Earthquake Resistance of Sloping Core Dams, H. Bolton Seed and Ray W. Clough, TR:129:327
Photogrammetry in Chile, Staff of Proyecto Aerofotogrametrico-Chile of the Organization of American States, TR:129:211

EARTHQUAKES Continued
Skopje Earthquake Damage, Walter E. Kunze, Mark Fintel, and James E. Amrhein, TR:129:570

EARTHWORK
Computers Provide a Shortcut in Earthwork Estimates for Dam Design, Robert S. Gooch, TR:129:543
Failure of a Side-Hill Highway Fill, William H. Rowan, Thomas R. Pierce, and Roger Webb, TR:129:195

ECONOMICS
Cost of Operating a Field Construction Office, John D. Bristor, TR:129:797
Economics of Urban Drainage Design, William J. Bauer, TR:129:335
Evaluation of Federal Hydroelectric Power Projects, William Whipple, Jr., TR:129:19
The European Common Market, Eugene E. Halmos, Jr., TR:129:103

EDUCATION
Big Opportunities in Public Administration, Calvin E. Perkins, TR:129:535
Civil Engineering Education, G. Brooks Earnest, TR:129:129
Civil Engineering Education...What Educators and Employers Think, Chester A. Moore, TR:129:575
Continuing Education--A Professional Imperative, Roy M. Green, TR:129:615
Education Requirements in Surveying and Geodesy, Carl I. Aslakson, TR:129:91
Geodetic Engineering Education in West Germany, Milton O. Schmidt, TR:129:87
Man-Machine Communications in Civil Engineering, Charles L. Miller, TR:129:919
Policy-Making Positions for Engineers, David P. Billington and Norman J. Sollenberger, TR:129:163
Professional Development of the Young Engineer, Rodney W. Johnson, TR:129:11
Role of Surveying in Civil Engineering Education, Milton O. Schmidt, TR:129:93
The Challenge of Continuing Technical Excellence, Bengt F. Friberg, TR:129:12

ELASTICITY
Buckling of Circular Arches Under Nonuniform Pressure, G. Wempner and T. Ewbank, TR:129:424
Damping in Discrete Linear Elastic Systems, Donald A. DaDeppo, TR:129:754
Dead Load Stresses and the Instability of Slopes, Lawrence E. Goodman and C.B. Brown, TR:129:89
Determination of Elastic Critical Loads, Leonard K. Stevens and Lewis C. Schmidt, TR:129:808
Dynamic Analysis of Inelastic Multi-Degree Systems, A.C. Heidebrecht, J.F. Fleming, and S.L. Lee, TR:129:843
Dynamic Bending of Elastic Columns, Herbert R. Bailey, TR:129:467
Dynamic Response of Elastic-Viscous-Plastic Columns, Cheng Y. Yang, Robert J. Hansen, and Kenneth F. Reinschmidt, TR:129:83
Dynamic Stresses in an Elastic Cylinder, C.C. Mow and W.L. McCabe, TR:129:780
Elastic-Plastic Deformations of Steel Structures, Kurt H. Gerstle and Vassilios Zarboulas, TR:129:337
Elastic Plates on a Liquid Foundation, Arnold D. Kerr, TR:129:642
Layered Systems Subjected to Surface Shears, Russell A. Westmann, TR:129:907
Stability of Equilateral Triangular Plates, William A. Bradley, TR:129:416
Structural Analysis of Solids, Robert J. Melosh, TR:129:397
Thermoelasticity of Heterogeneous Aelotropic Plates, Yehuda Stavsky, TR:129:737

ELECTRONICS
Electronic Surveying: Accuracy of Electronic Positioning Systems, Henry W. Bigelow, TR:129:892
Electronic Surveying: Electronic Distance Measurements, A.E. Harrison, TR:129:708

ENERGY
Buckling for Stepped Columns with Rotated Ends, Robert E. Sennett, III, and Sidney Shore, TR:129:50
Free Energy as a Parameter in Biological Treatment, James A. Servizi and Richard H. Bogan, TR:129:721
The Submerged Hydraulic Jump, N.S. Govinda Rao and N. Rajaratnam, TR:129:427

ENGINEERING MECHANICS
Analysis of Free Straight Multiflight Staircases, Avinada Siev, TR:129:271
Analytical Methods in Transportation: Operations Research in Tunnel Traffic Control, Leslie C. Edie, TR:129:899
Analytical Methods in Transportation: Systems Analysis for Arterial Street Operation, Charles Pinnell and Gilbert T. Satterly, TR:129:846
Buckling of Circular Arches Under Nonuniform Pressure, G. Wempner and T. Ewbank, TR:129:424
Buckling of Thin Shells Under External Pressure, Anthony E. Armenàkas and George Herrmann, TR:129:347
Distribution of Structural Response to Earthquakes, Emilio Rosenblueth and Jorge I. Bustamante, TR:129:413
Dynamic Analysis of Inelastic Multi-Degree Systems, A.C. Heidebrecht, J.F. Fleming, and S.L. Lee, TR:129:843
Dynamic Behavior of Supercritically Loaded Struts, George W. Housner and Wai Keung Tso, TR:129:603
Dynamic Response of Elastic-Viscous-Plastic Columns, Cheng Y. Yang, Robert J. Hansen, and Kenneth F. Reinschmidt, TR:129:83
Dynamic Response of Lattice-Type Structures, Bruce S. Berger and Sidney Shore, TR:129:96

Dynamic Stresses in an Elastic Cylinder, C.C. Mow and W.L. McCabe, TR:129:780
Effect of Structure and Foundation Interaction, Daniel L. Lycan and Nathan M. Newmark, TR:129:35
Elastic Plates on a Liquid Foundation, Arnold D. Kerr, TR:129:642

ENGINEERING MECHANICS Continued
Elastic Rayleigh Wave Motions Due to Nuclear Blasts, Melvin L. Baron and Ronald Check, TR:129:876
Energy Criterion and Snap Buckling of Arches, A. Gjelsvik and S.R. Bodner, TR:129:281
Fracture of Plain Concrete, Joseph Glucklich, TR:129:896
Interpretation of Moire Patterns, A.J. Durelli, C.A. Sciammarella, and V.J. Parks, TR:129:237
Large Deflections of Plates on Elastic Foundations, S.N. Sinha, TR:129:875
Layered Systems Subjected to Surface Shears, Russell A. Westmann, TR:129:907
Matrix Division, George Kostro, TR:129:626
Mechanics of Crack Arrest in Concrete, James P. Romualdi and Gordon B. Batson, TR:129:918
Membrane Analysis of Shells, Donald L. Dean, TR:129:691
Model Predictions of Fracture Due to Explosions, Charles W. Martin and Glenn Murphy, TR:129:398
Moving Step-Load on Half-Space of Granular Material, Hans H. Bleich and Ewald Heer, TR:129:258
Natural Periods of Vibration of Buildings, G. W. Housner and A.G. Brady, TR:129:894
Natural Vibrations of Partially Clamped Plates, Muneaki Kurata and Hirokazu Okamura, TR:129:299
Nonsymmetrical Snap Buckling of Spherical Caps, A. Gjelsvik and S.R. Bodner, TR:129:78
Parameters in the Distribution of Fatigue Life, E.J. Gumbel, TR:129:612
Plastic Buckling Pressure for Spherical Shells, Myron E. Lunchick, TR:129:638
Rigid-Plastic Analysis of General Structures, J.B. Martin, TR:129:62
Thermoelasticity of Heterogeneous Aelotropic Plates, Yehuda Stavsky, TR:129:737
Transverse Normal Stress in Beams, Jerome L. Sackman, TR:129:646
Vibration of Circular Plates at Large Amplitudes, Thein Wah, TR:129:429

ENGINEERS AND ENGINEERING
An Engineer Goes Abroad, Edmund B. Besselievre, TR:129:99
An Indoctrination Ritual for Engineers, William H. Wisely, TR:129:493
Big Opportunities in Public Administration, Calvin E. Perkins, TR:129:535
Civil Engineering Education, G. Brooks Earnest, TR:129:129
Civil Engineering Education...What Educators and Employers Think, Chester A. Moore, TR:129:575
Civil Engineers in Government Service, E.E. Halmos, Jr., TR:129:567
Competence is What Counts Most, Waldo G. Bowman, TR:129:545
Continuing Education--A Professional Imperative, Roy M. Green, TR:129:615
Engineering Salaries up Sixty Percent in Ten Years, Carl Frey, TR:129:197
Exporting Consulting Engineering, Konstantine L. Kollar, TR:129:490
First Peace Corps Surveyors and Engineers, Russell C. Brinker, TR:129:73
Forefront of Civil Engineers of Tomorrow, Shu-t'ien Li, TR:129:1
Hour of Destiny for Engineering, Norman D. Lea, TR:129:555
Impact of the Computer on the Young Engineer, Elmer K. Timby, TR:129:4
Public Recognition--A Measure of the Civil Engineer's Success, Don M. Corbett, TR:129:167
Negotiating for Engineering Services--The Consulting Engineer's Viewpoint, Nathaniel P. Turner, Jr., TR:129:146
New Dimensions for Civil Engineering, Annual Address at the Conference, Salt Lake City, Utah, May 12, 1964, Waldo G. Bowman, TR:129:925
1964 Preview, Frank Schneller, TR:129:557
Policy-Making Positions for Engineers, David P. Billington and Norman J. Sollenberger, TR:129:163
Principles of a Sound Transportation Policy, TR:129:484
Professional Development of the Young Engineer, Rodney W. Johnson, TR:129:11
Returns from 1963 ASCE Employment Survey, ASCE Committee on Employment Conditions, TR:129:516
Role of Surveying in Civil Engineering Education, Milton O. Schmidt, TR:129:93
The ASCE Philosophy of Engineering Unity, TR:129:474
The Challenge of Continuing Technical Excellence, Bengt F. Friberg, TR:129:12
The Engineer's Role in Planning Urban Renewal, James W. Follin, TR:129:596
The European Common Market, Eugene E. Halmos, TR:129:103
The Professional Engineer and His Values, Robert F. Garfoot and J. Richard Simon, TR:129:222
The Rise and Fall of Professional Engineering, C. Ken Weidner, TR:129:118
Who Pays for the Unexpected in Construction? TR:129:514

ENVIRONMENTAL ENGINEERING
Nuclear Power in the Antarctic Environment, Philip W. Brewer, TR:129:434

EROSION
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Mechanics of Cavitation, Virgil E. Johnson, Jr., TR:129:662
Stabilization of Fivemile and Muddy Creeks, Carl R. Miller and Whitney M. Borland, TR:129:232
Wave Action Below Spillways, Mohamed Mokhles Abou-Seida, TR:129:80

ESTIMATES
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837

ESTUARIES
Hydraulic Model Tests of Estuarial Waste Dispersion, Richard L. O'Connell and Carl M. Walter, TR:129:719

EVAPORATION
Evaporation from a Covered Reservoir, Joseph B. Franzini and David W. Hill, TR:129:193

EXPLOSIVES
Densification of Soils by Explosive Vibrations, Byron J. Prugh, TR:129:663

FAILURES
Dead Load Stresses and the Instability of Slopes, Lawrence E. Goodman and C.B. Brown, TR:129:89
Dynamic Pressure of Granular Material in Deep Bins, Alexander M. Turitzin, TR:129:407
Shear Strength Properties of a Sodium Illite, Roy E. Olson, TR:129:291
Study of Failure Envelope of Soils, T.H. Wu, A.K. Loh and L.E. Malvern, TR:129:388

FAIRS
GE's World's Fair Pavilion, Stanley A. Graves, TR:129:498

FILTRATION
Functional Design of Rapid Sand Filters, H.E. Hudson, Jr., TR:129:229

FILTERS
Functional Design of Rapid Sand Filters, H.E. Hudson, Jr., TR:129:229

FINANCING
International Credit Unlocks Andean Hydro, Stanford P. McCasland, TR:129:109
Operations Research in Construction Planning, Robert L. Nicholls, TR:129:834

FLOCCULATION
Effect of Paddle Design on Flocculation, Neil L. Drobny, TR:129:42
Functional Design of Rapid Sand Filters, H.E. Hudson, Jr., TR:129:229

FLOOD CONTROL
Flood Control Operation of Reservoirs, Leo R. Beard, TR:129:623
Modern Flood-Plain Zoning Ordinance Adopted by Iowa City, Joseph W. Howe, TR:129:160

FLOODS
Extension of Rating Curves by Field Surveys, Walter T. Sittner, TR:129:286
Short Cuts in Hydrology, Arthur I. McCutchan, TR:129:670

FLOODS (General)
Economics of Urban Drainage Design, William J. Bauer, TR:129:335

FOREIGN ENGINEERING
An Engineer Goes Abroad, Edmund B. Besselievre, TR:129:99
Exporting Consulting Engineering, Konstantine L. Kollar, TR:129:490
International Credit Unlocks Andean Hydro, Stanford P. McCasland, TR:129:109
International Relationships in Engineering, William H. Wisely, TR:129:199
Machine Tunneling in Tasmania, Henry H. Thomas, TR:129:150
Russian Construction Boom, James K. Carr, TR:129:140
The European Common Market, Eugene E. Halmos, Jr., TR:129:103
Utilities for the Divided City of Berlin, Gustav J. Requardt, TR:129:115

FOUNDATIONS
A New Project for Mexico City, Romeo Enriquez R. and Alejandro Fierro, TR:129:216
Computer Study of Dynamic Behavior of Piling, Charles H. Samson, Jr., Teddy J. Hirsch, and Lee L. Lowery, Jr., TR:129:764
Densification of Soils by Explosive Vibrations, Byron J. Prugh, TR:129:663
Effect of Structure and Foundation Interaction, Daniel L. Lycan and Nathan M. Newmark, TR:129:35
Experience with Canadian Varved Clays, Victor Milligan, L.G. Soderman, and A. Rutka, TR:129:605
Foundation Problems on the Second Elizabeth River Tunnel, George J. Murphy and Isaac W. Tarshansky, TR:129:488
Installation Problems with Cast-in-Place Concrete Piles, Michael Praszker, TR:129:144
Large Deflections of Plates on Elastic Foundations, S.N. Sinha, TR:129:875
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Load Transfer in End-Bearing Steel H-Piles, Elio D'Appolonia and James P. Romualdo, TR:129:363
Oahe Dam: Influence of Shale on Oahe Power Structures Design, Edward A. Johns, R.G. Burnett, and C.L. Craig, TR:129:249
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614
Pile Foundations for Retaining Structures, K. R. Patel, TR:129:560
Pretest Tiebacks and Drilled-In Caissons, Robert E. White, TR:129:174
Stability of Deep Cuts in Clay, W.D. Liam Finn, TR:129:215
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607
Test of Concrete Pavements on Crushed Stone, L.D. Childs and Joe W. Kapernick, TR:129:777
Timber Piles Reused in Place, Eugene A. Dubin, TR:129:203
Tank Foundations in Eastern Venezuela, Emery D. Carlson and Stephen P. Fricano, TR:129:824
Uplift Resistance of Transmission Tower Footings, Edward A. Turner, TR:129:288

FOUNDATIONS (General)
Design of EHV Tower Transmission Lines, Warren O. Petersen, TR:129:17

FRACTURE
Model Predictions of Fracture Due to Explosions, Charles W. Martin and Glenn Murphy, TR:129:398

FRAMES
Analysis of Arch Frames, F.P. Wiesinger, S.L. Lee, and D.L. Guell, TR:129:922
Analysis of Rigid Frames by Difference Equations, Hsien-San Tsang, TR:129:75
Columns in Planar Continuous Structures, Morris Ojalvo and Victor Levi, TR:129:240

FRAMES Continued
Determination of Elastic Critical Loads, Leonard K. Stevens and Lewis C. Schmidt, TR:129:808
Dynamic Flexibility Matrix Analysis of Frames, Kenneth W. Levien and Billy J. Hartz, TR:129:890
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761
Iterative Method in Frame Analysis, Paul Lustgarten, TR:129:868
Large Capacity Multistory Frame Analysis Programs, Ray W. Clough, Edward L. Wilson, and Ian P. King, TR:129:865
Matrix Solution of Force Relaxation Method, Chuan C. Feng, TR:129:632
Method for Plastic Design of Frames, George J. Megarefs and Philip G. Hodge, Jr., TR:129:260
Rigid-Plastic Analysis of General Structures, J.B. Martin, TR:129:62
Simplified Formulation of Stiffness Matrices, Peter M. Wright, TR:129:840
Space Frame Analysis by Matrices and Computer, Kurt Eisemann, Lin Woo, and Saul Namyet, TR:129:609
Stability of Frames Under Primary Bending Moments, Le-Wu Lu, TR:129:913
Stability of Space Frames by Computer Analysis, John D. Renton, TR:129:225
Steel Column Design for Multistory Rigid Frames, Charles F. Beck and Max Zar, TR:129:729

FRICTION
Hydraulic Roughness of Corrugated Pipes, Charles R. Neill, TR:129:340
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607
Turbulent Flow in Rectangular Ducts, Hans J. Leutheusser, TR:129:659

GAGES
Securing More Nearly True Precipitation Measurements, Leonard L. Weiss, TR:129:45
Sliding of Composite-Type Breakwaters by Breaking Waves, Shoshichiro Nagai, TR:129:370

GAGES, STREAM
Streamflow Records by Digital Computer, Edward J. Kennedy, TR:129:818

GEODESY
Education Requirements in Surveying and Geodesy, Carl I. Aslakson, TR:129:91
Geodetic Engineering Education in West Germany, Milton O. Schmidt, TR:129:87
Geodesy and the Torsion Balance, Ivan I. Mueller, TR:129:463

GEODETICS
Scintillation and the Surveyor, Lee D. Miller, TR:129:688

GEOLOGY
An Approach to Rock Mechanics, Klaus W. John, TR:129:304
Oahe Dam: Geology, Embankment, and Cut Slopes, Donald K. Knight, TR:129:643
Oahe Dam: Influence of Shale on Oahe Power Structures Design, Edward A. Johns, R.G. Burnett, and C.L. Craig, TR:129:249
St. Anthony Falls Navigation Project, Francis E. Mullen, TR:129:52

GIRDERS
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761

GOVERNMENT
Evaluation of Federal Hydroelectric Power Projects, William Whipple, Jr., TR:129:19
The Professional Engineer and His Values, Robert F. Garfoot and J. Richard Simon, TR:129:222

GROUND WATER
Conjunctive Operation of Dams and Aquifers, Nathan Buras, TR:129:789
Dispersion-Permeability Correlation in Porous Media, Donald R.F. Harleman, P.F. Mehlhorn, and Ralph R. Rumer, Jr., TR:129:58
Ground Water in Texas, Mervin L. Klug, TR:129:617
Intruded Salt-Water Wedge in Porous Media, Ralph R. Rumer, Jr., and Donald R.F. Harleman, TR:129:871
Mechanics of a Mathematical Ground-Water Model, Frank J. Trelease and Morton W. Bittinger, TR:129:675
Nonsteady Flow for Wells with Decreasing Discharge, Mahmoud A. Abu-Zied and Verne H. Scott, TR:129:883
Replenishment of Aquifers Intersected by Streams, Roger J.M. De Wiest, TR:129:853
Salt Balances in Ground Water, Aharon Meron and Harvey F. Ludwig, TR:129:667

GROUTING
Pomme de Terre Dam of Earth and Rockfill, Louis G. Elser and Dean E. Schuster, TR:129:246
Seepage Under Dams, Hammad Y. Hammad, TR:129:263

HARBORS
Sliding of Composite-Type Breakwaters by Breaking Waves, Shoshichiro Nagai, TR:129:370

HARBORS (General)
Dynamic Response and Stability of Piers on Piles, James Michalos, TR:129:27
Evaluation of Mooring Forces, Shu-t'ien Li, TR:129:365
Offshore Mooring Island for Supertankers, Virgil Blancato and Joseph H. Finger, TR:129:301

HIGHWAYS
Analytical Methods in Transportation: Systems Analysis for Arterial Street Operation, Charles Pinnell and Gilbert T. Satterly, TR:129:846
Failure of a Side-Hill Highway Fill, William H. Rowan, Thomas R. Pierce, and Roger Webb, TR:129:195
Flexible Pavement for a New Hampshire Interstate Route, Daniel S. Bailey, Jr., TR:129:113

HIGHWAYS Continued
Lime Stabilizes Shale Subgrade, Richard O. Berg and Charles A. Piper, Jr., TR:129:512
Paving Interstate 80 in the Sierra Nevada, Alan S. Hart, TR:129:551
Rail Transit in the Highway Median--Yes or No? Joseph Barnett, TR:129:107
The Road Show--A Product of American Enterprise, H.A. Radzikowski, TR:129:124

HIGHWAYS AND ROADS
Length of Culverts, K.R. Patel, TR:129:309
Properties of Roadbeds, Ira B. Mullis, TR:129:755

HIGHWAYS AND ROADS (General)
Behavior of Volcanic Soils in Highway Construction, Jorge Ernesto Erdmenger, TR:129:29
Capacity of Urban Transportation Modes, Walter S. Rainville, Jr., and Wolfgang S. Homburger, TR:129:747
Urban Transportation Tasks of the Future, Wilbur S. Smith, TR:129:682
Vertical Curve Plotting, James W.O. Baker, TR:129:774

HOUSING
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837

HURRICANES
Investigation of the Statistics of Wave Heights, R.C. Goodknight and T.L. Russell, TR:129:805

HYDRAULIC JUMP
The Submerged Hydraulic Jump, N.S. Govinda Rao and N. Rajaratnam, TR:129:427
Wave Action Below Spillways, Mohamed Mokhles Abou-Seida, TR:129:80

HYDRAULICS
Accuracy of Current Meter Measurements, Rolland W. Carter and Irving E. Anderson, TR:129:668
Analysis of Synthetic Unit-Graph Methods, Paul E. Morgan and Stanley M. Johnson, TR:129:727
An Analysis of Relief Bridge Scour, Emmett M. Laursen, TR:129:622
An Expression for Bed-Load Transportation, M. Selim Yalin, TR:129:665
Atmospheric Moisture-Precipitation Relations, Floyd A. Huff, TR:129:757
Boundary Flow Along a Circular Cylinder, Robert O. Reid and Basil W. Wilson, TR:129:334
Boundary Shear Stresses in Curved Trapezoidal Channels, Arthur T. Ippen and Phillip A. Drinker, TR:129:55
Calculated Risks of Impounding Reservoir Yield, John B. Stall and James C. Neill, TR:129:330
Cavitation in Hydraulic Structures: Problems Created by Cavitation Phenomena, Fred R. Brown, TR:129:874
Cavitation in Hydraulic Structures: Scale Effects Involved in Cavitation Experiments, James M. Robertson, TR:129:85
Channel Stability in Undisturbed Cohesive Soils, Elliott M. Flaxman, TR:129:385
Conjunctive Operation of Dams and Aquifers, Nathan Buras, TR:129:789
Design Waves for Littoral Drift Models, Richard Silvester, TR:129:447
Economics of Urban Drainage Design, William J. Bauer, TR:129:335
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Experimental Apparatus Studies Sediment Transport in Closed Conduits, Hans A. Einstein and Walter H. Graf, TR:129:585
Extension of Rating Curves by Field Surveys, Walter T. Sittner, TR:129:286
Flood Control Operation of Reservoirs, Leo R. Beard, TR:129:623
Flood Waves in Prismatic Channels, Francis M. Henderson, TR:129:738
Flow Characteristics of Axisymmetric Expansions, M.C. Chaturvedi, TR:129:849
Flow of Clay Water Suspensions, Charles D.D. Howard, TR:129:859
Ground Water in Texas, Mervin L. Klug, TR:129:617
Hydraulic Design of Small Bridges, Alfred R. Pagan, TR:129:579
Hydraulic Model Tests of Estuarial Waste Dispersion, Richard L. O'Connell and Carl M. Walter, TR:129:719
Hydraulic Roughness of Corrugated Piles, Charles R. Neill, TR:129:340
Intruded Salt-Water Wedge in Porous Media, Ralph R. Rumer, Jr., and Donald R.F. Harleman, TR:129:871
Limitations of Metergates, James W. Ball, TR:129:14
Manning's Formula for Wide Trapezoidal Channels, C.J. Posey and S.N. Pagay, TR:129:151
Measuring Rainfall and Runoff at Storm-Water Inlets, John W. Knapp, John S. Schaake, Jr., and Warren Viessman, Jr., TR:129:803
Mechanics of Cavitation, Virgil E. Johnson, Jr., TR:129:662
Nonsteady Flow for Wells with Decreasing Discharge, Mahmoud A. Abu-Zied and Verne H. Scott, TR:129:883
Perspective on National Water Resources Planning, Theodore M. Schad, TR:129:67
Projected Nappes Subject to Transverse Pressure, H. Ivan Schwartz, TR:129:296
Radial Collector Wells Adjacent to the River Bank, Miloje Milojevic, TR:129:786
Replenishment of Aquifers Intersected by Streams, Roger J.M. De Wiest, TR:129:853
Scour at Bridge Piers, Luigi Stabilini and C.J. Posey, TR:129:184
Sediment-Transport Capability in Erodible Channels, Shieh-Wen Mao and Leonard Rice, TR:129:792
Shear Measurements for Rough Surfaces, Li-San Hwang and Emmett M. Laursen, TR:129:606
Short Cuts in Hydrology, Arthur I. McCutchan, TR:129:670
Side-Channel Spillway Design, Harold S. Farney and Adolfs Markus, TR:129:39
Solving the Equations of Uniform Flow, William F. Pickard, TR:129:769
Spatially Varied Flow from Controlled Rainfall, Dah-Cheng Woo and Ernest F. Brater, TR:129:319
Synthetic Unit Hydrographs for Small Watersheds, Don M. Gray, TR:129:628

HYDRAULICS Continued
Turbulent Flow in Rectangular Ducts, Hans J. Leutheusser, TR:129:659
Turbulent Flow with Suspended Particles, Mikio Hino, TR:129:266
Unit Hydrograph Characteristics for Sewered Areas, Peter S. Eagleson, TR:129:37
Use of Nylon in Hydraulic Engineering, Ir. J.P.A. Van Lookeren Campagne, TR:129:105
Valve Stroking to Control Water Hammer, Victor L. Streeter, TR:129:322
Velocity Concentrations in Stratified Fluids, Robert R. Long, TR:129:813
Volume-Weight of Reservoir Sediment, Herman G. Heinemann, TR:129:64
Wave Action Below Spillways, Mohamed Mokhles Abou-Seida, TR:129:80

HYDRODYNAMICS
Boundary Flow Along a Circular Cylinder, Robert O. Reid and Basil W. Wilson, TR:129:334
Boundary Shear Stresses in Curved Trapezoidal Channels, Arthur T. Ippen and Phillip A. Drinker, TR:129:55
Evaluation of Mooring Forces, Shu-t'ien Li, TR:129:365
Groups of Vertical Cylinders Oscillating in Water, Alan D.K. Laird and R.P. Warren, TR:129:311
Shear Measurements for Rough Surfaces, Li-San Hwang and Emmett M. Laursen, TR:129:606
Velocity Concentrations in Stratified Fluids, Robert R. Long, TR:129:813

HYDROGRAPHS
Synthetic Unit Hydrographs for Small Watersheds, Don M. Gray, TR:129:628
Unit Hydrograph Characteristics for Sewered Areas, Peter S. Eagleson, TR:129:37

HYDROLOGY
Analysis of Synthetic Unit-Graph Methods, Paul E. Morgan and Stanley M. Johnson, TR:129:727
A Moving Boatline for River Flow Measurement, Franklin C. Craig and Winchell Smith, TR:129:518
Design of Tile Drainage for Falling Water Tables, Jan van Schilfgaarde, TR:129:815
Economics of Urban Drainage Design, William J. Bauer, TR:129:335
Electronic Computers in Watershed Research, L.L. Kelly, TR:129:634
Measuring Rainfall and Runoff at Storm-Water Inlets, John W. Knapp, John S. Schaake, Jr., and Warren Viessman, Jr., TR:129:803
Model for River Regulation, Lewis L. Sheerar, TR:129:847
Nonsteady Flow for Wells with Decreasing Discharge, Mahmoud A. Abu-Zied and Verne H. Scott, TR:129:883
Securing More Nearly True Precipitation Measurements, Leonard L. Weiss, TR:129:45
Short Cuts in Hydrology, Arthur I. McCutchan, TR:129:670
Unit Hydrograph Characteristics for Sewered Areas, Peter S. Eagleson, TR:129:37

INDUSTRY
The Professional Engineer and His Values, Robert F. Garfoot and J. Richard Simon, TR:129:222

INSPECTION
Cost of Operating a Field Construction Office, John D. Bristor, TR:129:797

INSTRUMENTS
Education Requirements in Surveying and Geodesy, Carl I. Aslakson, TR:129:91
Measuring Rainfall and Runoff at Storm-Water Inlets, John W. Knapp, John S. Schaake, Jr., and Warren Viessman, Jr., TR:129:803
Measuring the Precision of a Level, Sumner B. Irish, TR:129:917
Streamflow Records by Digital Computer, Edward J. Kennedy, TR:129:818

IRRIGATION
Design of Metal Pipe for Irrigation Structures, Darrell N. Blake, TR:129:732
Quality and Significance of Irrigation Return Flow, Robert O. Sylvester and Robert W. Seabloom, TR:129:460
Subsurface Water Distribution in Surface Irrigation, Ernest T. Smerdon, TR:129:324
Unique Consumptive Use Curve Related to Irrigation Practice, Vaughn E. Hansen, TR:129:654
Water Distribution from Medium Pressure Sprinklers, Ido Seginer, TR:129:332

IRRIGATION (General)
Limitations of Metergates, James W. Ball, TR:129:14

JOINTS
Analysis of Folded Plates, David Yitzhaki and Max Reiss, TR:129:383
Waterproofing Exposed Masonry Walls, T.R. Lazarr, TR:129:533

LAW
Land Surveying and Land Registration, John G. McEntyre and Arthur J. McNair, TR:129:877
Problems in Property Surveys and Right-of-Way Maps, Frank Bonacci, TR:129:449
Uniform Requirements for Property Surveys, Winfield H. Eldridge, TR:129:70

LOAD
Bearing Capacity of Piles in Cohesionless Soils, Reymond L. Nordlund, TR:129:640
Intepretation of Moire Patterns, A.J. Durelli, C.A. Sciammarella, and V.J. Parks, TR:129:237
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Load Transfer in End-Bearing Steel H-Piles, Elio D'Appolonia and James P. Romualdi, TR:129:363
Limit Analysis of Cylindrical Shells, Robert E. Ball and Seng-Lip Lee, TR:129:651

LOADS
Analysis of Rigid Frames by Difference Equations, Hsien-San Tsang, TR:129:75

LOADS Continued
Dead Load Stresses and the Instability of Slopes, Lawrence E. Goodman and C.B. Brown, TR:129:89

LOCKS
Meldahl Locks and Dam, William F. McCraw, Jr., TR:129:527

MAINTENANCE
Flow Retardance by Channel Weeds and Their Control, John C. Stephens, R.D. Blackburn, D.E. Seaman, and L.W. Weldon, TR:129:724

MANAGEMENT
Cost of Operating a Field Construction Office, John D. Bristor, TR:129:797
Operations Research in Construction Planning, Robert L. Nicholls, TR:129:834

MAPPING
Error Problems in Aerial Photogrammetry, Sumner B. Irish, TR:129:885
Military Requirements for Topographic Maps, Frederick O. Diercks, TR:129:375
Photogrammetry in Chile, Staff of Proyecto Aerofogrametrico-Chile of the Organization of American States, TR:129:211
Problems in Property Surveys and Right-of-Way Maps, Frank Bonacci, TR:129:449

MAPS
Civil Requirements for Topographic Maps, Robert H. Lyddan, TR:129:845
Military Requirements for Topographic Maps, Frederick O. Diercks, TR:129:375

MARINAS
Concrete for Marinas, Edward P. Sellner, TR:129:482

MASONRY
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614
Waterproofing Exposed Masonry Walls, T.R. Lazarr, TR:129:533

MATERIALS
Behavior of Volcanic Soils in Highway Construction, Jorge Ernesto Erdmenger, TR:129:29
Fire Protection for Aluminum Alloy Structural Shapes, J.G. Kaufman and Richard C. Kasser, TR:129:153
Granulometric Properties of Cement Stabilized Sands, Bruce G. Hutchinson, TR:129:255
Nondestructive Testing, Charles W. Britzius, TR:129:101
Structural Synthesis with Buckling Constraints, Lucien A. Schmit, Jr., and William M. Morrow, TR:129:252
Use of Nylon in Hydraulic Engineering, Ir. J.P.A. Van Lookeren Campagne, TR:129:105

MATHEMATICS
Consistent Mass Matrix for Distributed Mass Systems, John S. Archer, TR:129:648
Deflection and Slope of Beams with Varying I, Otakar Ondra, TR:129:741
Dynamic Nonlinear Response of Reinforced Concrete Arches, Vijay N. Gupchup and John M. Biggs, TR:129:826
Iterative Method in Frame Analysis, Paul Lustgarten, TR:129:868
Matrix Derivation of the Folded Plate Equations, J.L. Meek, TR:129:759
Matrix Solution of Force Relaxation Method, Chuan C. Feng, TR:129:632
Network Analogy for Linear Structures, William R. Spillers, TR:129:804
Optimum Solution Techniques for Finite-Difference Equations, Richard N. White, TR:129:444
Replenishment of Aquifers Intersected by Streams, Roger J.M. De Wiest, TR:129:853
Simplified Formulation of Stiffness Matrices, Peter M. Wright, TR:129:840
Solving the Equations of Uniform Flow, William F. Pickard, TR:129:769
Structural Analysis of Solids, Robert J. Melosh, TR:129:397

METALS
Aluminum at Rocky Reach, Robert M. Peters, TR:129:476
Design of Metal Pipe for Irrigation Structures, Darrell N. Blake, TR:129:732

METEOROLOGY
A Moving Boatline for River Flow Measurement, Franklin C. Craig and Winchell Smith, TR:129:518
Atmospheric Moisture-Precipitation Relations, Floyd A. Huff, TR:129:757

METERS
Accuracy of Current Meter Measurements, Rolland W. Carter and Irving E. Anderson, TR:129:668
Pomme de Terre Dam of Earth and Rockfill, Louis G. Elser and Dean E. Schuster, TR:129:246
Seepage Meters in Seepage and Recharge Studies, Herman Bouwer and R.C. Rice, TR:129:243

MISSILES
Re-entry Vehicle Optimization and Synthesis Program, T.E. Hess, James C. Bailey, and H.J. Most, TR:129:887
Water Supplies for Titan ICBM Bases, Frederick J. Matthies, TR:129:283

MODELS
Cavitation in Hydraulic Structures: Scale Effects Involved in Cavitation Experiments, James M. Robertson, TR:129:85
Design Waves for Littoral Drift Models, Richard Silvester, TR:129:447
Dynamics of a Large Steerable Radio Telescope Antenna, William Weaver, Jr., and Thomas R. Kane, TR:129:686
Granulometric Properties of Cement Stabilized Sands, Bruce G. Hutchinson, TR:129:255
Grit Unbalance in Sewage Flow Division. Y. Yoshimi and T.E. Stelson, TR:129:344
Hydraulic Model Tests of Estuarial Waste Dispersion, Richard L. O'Connell and Carl M. Walter, TR:129:719
Mechanics of a Mathematical Ground-Water Model, Frank J. Trelease and Morton W. Bittinger, TR:129:675

MODELS Continued
Model Predictions of Fracture Due to Explosions, Charles W. Martin and Glenn Murphy, TR:129:398
Model Studies of Beams Resting on a Silt Subgrade, Aleksandar B. Vesić and Wesley H. Johnson, TR:129:410
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614
Plane Stress Analysis, Caleb W. McCormick, TR:129:856
Radial Collector Wells Adjacent to the River Bank, Miloje Milojevic, TR:129:786
Replenishment of Aquifers Intersected by Streams, Roger J.M. De Wiest, TR:129:853

NAVIGATION
St. Anthony Falls Navigation Project, Francis E. Mullen, TR:129:52

OCEANS
Investigation of the Statistics of Wave Heights, R.C. Goodknight and T.L. Russell, TR:129:805

OPTIMIZATION
Structural Synthesis and Design Parameter Hierarchy, Lucien A. Schmit, Jr., and Robert H. Mallett, TR:129:441

OXYGENATION
Prediction of Stream Reaeration Rates, Milo A. Churchill, H.L. Elmore, and R.A. Buckingham, TR:129:24

PAVEMENT
Flexible Pavement for a New Hampshire Interstate Route, Daniel S. Bailey, Jr., TR:129:113

PAVEMENTS
Lime Stabilizes Shale Subgrade, Richard O. Berg and Charles A. Piper, Jr., TR:129:512
Paving Interstate 80 in the Sierra Nevada, Alan S. Hart, TR:129:551
Test of Concrete Pavements on Crushed Stone, L.D. Childs and Joe W. Kapernick, TR:129:777

PERMEABILITY
Deep Injection Disposal Well for Liquid Toxic Waste, O.E. Mechem and J.H. Garrett, TR:129:800
Dispersion-Permeability Correlation in Porous Media, Donald R.F. Harleman, P.F. Mehlhorn, and Ralph R. Rumer, Jr., TR:129:58

PETROLEUM
Tank Foundations in Eastern Venezuela, Emery D. Carlson and Stephen P. Fricano, TR:129:824

PHOTOGRAMMETRY
Error Problems in Aerial Photogrammetry, Sumner B. Irish, TR:129:885
Photogrammetric Determination of Azimuths, Michael S. Tavenner and Paul B. Swenson, TR:129:921
Photogrammetric Engineering and Reservoir Planning, Pliny Gale, TR:129:880
Photogrammetry in Chile, Staff of Proyecto Aerofotogrametrico-Chile of the Organization of American States, TR:129:211
Photogrammetry to Locate Water, Alfred O. Quinn, TR:129:501

PIERS
Scour at Bridge Piers, Luigi Stabilini and C.J. Posey, TR:129:184

PILES
Allowable Bearing Capacity of Initially Bent Piles, Bengt B. Broms, TR:129:455
All-Steel Abutments for Highway Bridges, John F. McDermott, TR:129:131
Bearing Capacity of Piles in Cohesionless Soils, Reymond L. Nordlund, TR:129:640
Computer Study of Dynamic Behavior of Piling, Charles H. Samson, Jr., Teddy J. Hirsch, and Lee L. Lowery, Jr., TR:129:764
Dynamic Response and Stability of Piers on Piles, James Michalos, TR:129:27
Expansion of a Cavity in a Saturated Clay Medium, B. Ladanyi, TR:129:619
Groups of Vertical Cylinders Oscillating in Water, Alan D.K. Laird and R.P. Warren, TR:129:311
Installation Problems with Cast-in-Place Concrete Piles, Michael Praszker, TR:129:144
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Load Transfer in End-Bearing Steel H-Piles, Elio D'Appolonia and James P. Romualdi, TR:129:363
Long Concrete Cylinder Piles for Deep-Water Platform, Gerald A. O'Connor, TR:129:165
Pile Foundations for Retaining Structures, K.R. Patel, TR:129:560
Timber Piles Reused in Place, Eugene A. Dubin, TR:129:203

PIPELINES
Cleaning and Lining a 6-In. Pipeline, John H. Baker, TR:129:161
Flow of Clay Water Suspensions, Charles D.D. Howard, TR:129:859
100-Mile Pipeline Brings Water to Oklahoma City, Herman E. Smith and Lee B. Washbourne, TR:129:529
Report on Pipeline Practice by an ASCE Division Task Force, Jack W. Pierce, TR:129:494
Thin Wall Pipe in Distribution Systems, Jack W. Pierce, TR:129:593
Valve Stroking to Control Water Hammer, Victor L. Streeter, TR:129:322

PIPES
Boundary Flow Along a Circular Cylinder, Robert O. Reid and Basil W. Wilson, TR:129:334
Design of Metal Pipe for Irrigation Structures, Darrell N. Blake, TR:129:732
Flow Characteristics of Axisymmetric Expansions, M.C. Chaturvedi, TR:129:849
Manning Roughness Factors for Concrete Sewer Pipe, Israel W. Santry, TR:129:637
Thin Wall Pipe in Distribution Systems, Jack W. Pierce, TR:129:593

PLANNING
Big Opportunities in Public Administration, Calvin E. Perkins, TR:129:535

PLANNING Continued
Operations Research in Construction Planning, Robert L. Nicholls, TR:129:634
Use of Critical Path Techniques, Charles W. Zahler, TR:129:436

PLASTICITY
Columns in Planar Continuous Structures, Morris Ojalvo and Victor Levi, TR:129:240
Dynamic Analysis of Inelastic Multi-Degree Systems, A.C. Heidebrecht, J.F. Fleming, and S.L. Lee, TR:129:843
Dynamic Response of Elastic-Viscous-Plastic Columns, Cheng Y. Yang, Robert J. Hansen, and Kenneth F. Reinschmidt, TR:129:83
Elastic-Plastic Deformations of Steel Structures, Kurt H. Gerstle and Vassilios Zarboulas, TR:129:337
Flexibility of Clay and Cracking of Earth Dams, Gerald A. Leonards and Jagdish Narain, TR:129:767
Method for Plastic Design of Frames, George J. Megarefs and Philip G. Hodge, Jr., TR:129:260
Plastic Buckling Pressure for Spherical Shells, Myron E. Lunchick, TR:129:638

PLASTICS
New Machine Lays Plastic Drains, James L. Fouss, TR:129:170

PLATES
Analysis of Folded Plates, David Yitzhaki and Max Reiss, TR:129:383
Direct Design of Plate and Shell Structures, John F. Brotchie, TR:129:469
Elastic Plates on a Liquid Foundation, Arnold D. Kerr, TR:129:642
Large Deflections of Plates on Elastic Foundations, S.N. Sinha, TR:129:875
Matrix Derivation of the Folded Plate Equations, J.L. Meek, TR:129:759
Natural Vibrations of Partially Clamped Plates, Muneaki Kurata and Hirokazu Okamura, TR:129:299
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Eugene Chesson, Jr., and William H. Munse, TR:129:458
Stability of Equilateral Triangular Plates, William A. Bradley, TR:129:416
Stresses in a Pressurized Box, H.D. Conway, TR:129:361
Thermoelasticity of Heterogeneous Aelotropic Plates, Yehuda Stavsky, TR:129:737
Vibration of Circular Plates at Large Amplitudes, Thein Wah, TR:129:429

POPULATION
Climate, Population, and Water Demand, Gulam M. Quraishi, TR:129:314

POWER
Civil Engineering for CVNPA Nuclear Power Plant, W.L. Klehm, TR:129:452
Environmental Factors in Transmission-Line Design, E.A. Roberts, TR:129:204
Innovations at Wanapum Dam, Uno V. Engstrom, TR:129:583
International Credit Unlocks Andean Hydro, Stanford P. McCasland, TR:129:109
Recreational Uses of Hydroelectric Reservoirs, Asa V. Shannon, K.O. Strenge, Rinard T. Lierboe, Jr., Howard W. Baker, William I. Palmer, and Reed A. Elliot, TR:129:496
Russian Construction Boom, James K. Carr, TR:129:140
Taum Sauk Pumped-Storage Power Project, Edward A. Rudulph, TR:129:111
Uplift Resistance of Transmission Tower Footings, Edward A. Turner, TR:129:288

POWER (Geographical)
John Day Lock and Dam: Planning and Site Selection, Glenn H. Von Gunten and John F. Bruce, TR:129:716
Symposium on Pumped Storage: Run-of-River Pumped Storage--Smith Mountain Project, Mark J. Hroncich and James M. Mullarkey, TR:129:394

POWER (General)
Evaluation of Federal Hydroelectric Power Projects, William Whipple, Jr., TR:129:19
Prediction of Temperature in Rivers and Reservoirs, Jerome M. Raphael, TR:129:702
Symposium on Pumped Storage: Development of Reversible Pump-Turbines, M. Braikevitch, D. Hartland, and R.A. Strubb, TR:129:705

POWER PLANTS
Civil Engineering for CVNPA Nuclear Power Plant, W.L. Klehm, TR:129:452
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761
Nuclear Power Plants--Economies in Design and Construction, Committee for Construction of Nuclear Facilities of the Construction Division of ASCE, W.C. Siler, Chmn, TR:129:191
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837

POWER PLANTS (Geographical)
Symposium on Pumped Storage: Run-of-River Pumped Storage--Smith Mountain Project, Mark J. Hroncich and James M. Mullarkey, TR:129:394

PRESSURE
Dynamic Pressure of Granular Material in Deep Bins, Alexander M. Turitzin, TR:129:407
Stresses in a Pressurized Box, H.D. Conway, TR:129:361

PRESSURES
Bearing Capacity of Piles in Cohesionless Soils, Reymond L. Nordlund, TR:129:640

PRESTRESSING
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614

PROBABILITY
Reliability Framework for Structural Design, Howard L. Leve, TR:129:771
Risk Criteria, Leon E. Borgman, TR:129:751

PROFESSIONAL PRACTICE
An Indoctrination Ritual for Engineers, William H. Wisely, TR:129:493

PROFESSIONAL PRACTICE Continued
Competence is What Counts Most, Waldo G. Bowman, TR:129:545
Continuing Education--A Professional Imperative, Roy M. Green, TR:129:615
Exporting Consulting Engineering, Konstantine L. Kollar, TR:129:490
Forefront of Civil Engineers of Tomorrow, Shu-t'ien Li, TR:129:1
Hour of Destiny for Engineering, Norman D. Lea, TR:129:555
Impact of the Computer on the Young Engineer, Elmer K. Timby, TR:129:4
Man-Machine Communications in Civil Engineering, Charles L. Miller, TR:129:919
Negotiating for Engineering Services--The Consulting Engineer's Viewpoint, Nathaniel P. Turner, Jr., TR:129:146
Professional Development of the Young Engineer, Rodney W. Johnson, TR:129:11
Public Recognition--A Measure of the Civil Engineer's Success, Don M. Corbett, TR:129:167
The Challenge of Continuing Technical Excellence, Bengt F. Friberg, TR:129:12
The Professional Engineer and His Values, Robert F. Garfoot and J. Richard Simon, TR:129:222
The Rise and Fall of Professional Engineering, C. Ken Weidner, TR:129:118

PROFILES
Solving the Equations of Uniform Flow, William F. Pickard, TR:129:769

POLLUTION
Oxygen Relationships in the Sacramento River, Charles G. Gunnerson and Thomas E. Bailey, TR:129:772
Prediction of Stream Reaeration Rates, Milo A. Churchill, H.L. Elmore, and R.A. Buckingham, TR:129:24

PUMPED STORAGE
Symposium on Pumped Storage: General Planning of Pumped Storage, Roger D. Ley and Edward S. Loane, TR:129:273

PUMPING
Nonsteady Flow for Wells with Decreasing Discharge, Mahmoud A. Abu-Zied and Verne H. Scott, TR:129:883
Symposium on Pumped Storage: Development of Reversible Pump-Turbines, M. Braikevitch, D. Hartland, and R.A. Strubb, TR:129:705
Symposium on Pumped Storage: Run-of-River Pumped Storage--Smith Mountain Project, Mark J. Hroncich and James M. Mullarkey, TR:129:394

PUMPS
Symposijm on Pumped Storage: Development of Reversible Pump-Turbines, M. Braikevitch, D. Hartland, and R.A. Strubb, TR:129:705

RADIOACTIVITY
Civil Engineering for CVNPA Nuclear Power Plant, W.L. Klehm, TR:129:452
Nuclear Power in the Antarctic Environment, Philip W. Brewer, TR:129:434

RAINFALL
Electronic Computers in Watershed Research, L.L. Kelly, TR:129:634
Measuring Rainfall and Runoff at Storm-Water Inlets, John W. Knapp, John S. Schaake, Jr., and Warren Viessman, Jr., TR:129:803
Model for River Regulation, Lewis L. Sheerar, TR:129:847
Securing More Nearly True Precipitation Measurements, Leonard L. Weiss, TR:129:45

RAINFALL (General)
Analysis of Synthetic Unit-Graph Methods, Paul E. Morgan and Stanley M. Johnson, TR:129:727
Atmospheric Moisture-Precipitation Relations, Floyd A. Huff, TR:129:757
Spatially Varied Flow from Controlled Rainfall, Dah-Cheng Woo and Ernest F. Brater, TR:129:319

RAPID TRANSIT
Rail Transit in the Highway Median--Yes or No? Joseph Barnett, TR:129:107

RECREATION
Are Our Criteria for Bathing-Water Pollution Valid? David L. Muss, TR:129:547
Recreational Uses of Hydroelectric Reservoirs, Asa V. Shannon, K.O. Strenge, Rinard T. Lierboe, Jr., Howard W. Baker, William I. Palmer, and Reed A. Elliot, TR:129:496

REFUSE DISPOSAL
Nuclear Power in the Antarctic Environment, Philip W. Brewer, TR:129:434

REGIONAL DEVELOPMENT
Interdependence of Transportation and City Planning, William S. Pollard, Jr., TR:129:891

REGULATIONS
Short Cuts in Hydrology, Arthur I. McCutchan, TR:129:670

REINFORCEMENT
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614

RESEARCH
Electronic Computers in Watershed Research, L.L. Kelly, TR:129:634
Operations Research in Construction Planning, Robert L. Nicholls, TR:129:834

RESERVOIRS
Calculated Risks of Impounding Reservoir Yield, John B. Stall and James C. Neill, TR:129:330
Conjunctive Operation of Dams and Aquifers, Nathan Buras, TR:129:789
Deep Injection Disposal Well for Liquid Toxic Waste, O.E. Mechem and J.H. Garrett, TR:129:800
Evaporation from a Covered Reservoir, Joseph B. Franzini and David W. Hill, TR:129:193
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Flood Control Operation of Reservoirs, Leo R. Beard, TR:129:623

RESERVOIRS Continued
Model for River Regulation, Lewis L. Sheerar, TR:129:847
Oahe Dam: Influence of Shale on Oahe Power Structures Design, Edward A. Johns, R.G. Burnett, and C.L. Craig, TR:129:249
Photogrammetric Engineering and Reservoir Planning, Pliny Gale, TR:129:880
Project Yield by a Probability Method, W. Don Maughan and Ray Y. Kawano, TR:129:734
Recreational Uses of Hydroelectric Reservoirs, Asa V. Shannon, K.O. Strenge, Rinard T. Lierboe, Jr., Howard W. Baker, William I. Palmer, and Reed A. Elliot, TR:129:496
Reservoir Mass Analysis by a Low-Flow Series, John B. Stall, TR:129:9
Volume-Weight of Reservoir Sediment, Herman G. Heinemann, TR:129:64

RESERVOIRS (General)
Prediction of Temperature in Rivers and Reservoirs, Jerome M. Raphael, TR:129:702

RETAINING WALLS
Boundary Value Problems of Soil Mechanics, W.D. Liam Finn, TR:129:784
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607

RIVERS
Model for River Regulation, Lewis L. Sheerar, TR:129:847
Oxygen Relationships in the Sacramento River, Charles G. Gunnerson and Thomas E. Bailey, TR:129:772
Stabilization of Fivemile and Muddy Creeks, Carl R. Miller and Whitney M. Borland, TR:129:232

RIVERS (General)
Prediction of Temperature in Rivers and Reservoirs, Jerome M. Raphael, TR:129:702

RIVETING
Design of Metal Pipe for Irrigation Structures, Darrell N. Blake, TR:129:732

RIVETS
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Charles W. Lewitt, Eugene Chesson, Jr., and William H. Munse, TR:129:355
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Eugene Chesson, Jr., and William H. Munse, TR:129:458
Riveted and Bolted Joints: Net Section Design, William H. Munse and Eugene Chesson, Jr., TR:129:297

ROCKS
Oahe Dam: Geology, Embankment, and Cut Slopes, Donald K. Knight, TR:129:643
Test of Concrete Pavements on Crushed Stone, L.D. Childs and Joe W. Kapernick, TR:129:777

ROOFS
Analysis of Prestressed Cylindrical Shell Roofs, Ryszard Dabrowski, TR:129:673

RUNOFF
Model for River Regulation, Lewis L. Sheerar, TR:129:847

RUNOFF (General)
Spatially Varied Flow from Controlled Rainfall, Dah-Cheng Woo and Ernest F. Brater, TR:129:319

SALARIES
Engineering Salaries up Sixty Percent in Ten Years, Carl Frey, TR:129:197

SAND
Basic Experiment Into Soil-Structure Interaction, Robert V. Whitman and Ulrich Luscher, TR:129:268
Elastic Wave Velocities in Granular Soils, Bobby O. Hardin and Frank E. Richart, Jr., TR:129:352
Functional Design of Rapid Sand Filters, H.E. Hudson, Jr., TR:129:229
Granulometric Properties of Cement Stabilized Sands, Bruce G. Hutchinson, TR:129:255
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607
Study of Failure Envelope of Soils, T.H. Wu, A.K. Loh and L.E. Malvern, TR:129:388

SANITARY ENGINEERING
Activated Sludge Plant for Milwaukee, Ray D. Leary and Louis R. Howson, TR:129:519
Analysis of Thickener Operation, Vaughn C. Behn and Jon C. Liebman, TR:129:472
Climate, Population, and Water Demand, Gulam M. Quraishi, TR:129:314
Dye Dispersion Studies, Alex N. Diachishin, TR:129:851
Fluorescent Tracers for Dispersion Measurements, Donald L. Feuerstein and Robert E. Selleck, TR:129:438
Free Energy as a Parameter in Biological Treatment, James A. Servizi and Richard H. Bogan, TR:129:721
Functional Design of Rapid Sand Filters, H.E. Hudson, Jr., TR:129:229
Grit Unbalance in Sewage Flow Division, Y. Yoshimi and T.E. Stelson, TR:129:344
Hydraulic Model Tests of Estuarial Waste Dispersion, Richard L. O'Connell and Carl M. Walter, TR:129:719
Incinerator Program for a County, Robert J. Mitchell, TR:129:213
Interceptor Sewer Built in a Lake, William J. Dorner and Walter J. Bushnell, TR:129:148
Kinetics of Adsorption on Carbon from Solution, Walter J. Weber, Jr., and J. Caroll Morris, TR:129:316
Manning Roughness Factors for Concrete Sewer Pipe, Israel W. Santry, TR:129:637
Mechanism of Coagulation in Water Treatment, S. Mackrle, TR:129:821
More Municipal Waste Treatment Works Needed, David H. Howells, TR:129:525
Nuclear Power in the Antarctic Environment, Philip W. Brewer, TR:129:434
100 MGD Added to Milwaukee's Water Supply, Herbert M. Ihlong and Donald P. Proudfit, TR:129:509
Prediction of Stream Reaeration Rates, Milo A. Churchill, H.L. Elmore, and R.A. Buckingham, TR:129:24
Reservoir Mass Analysis by a Low-Flow Series, John B. Stall, TR:129:9

SANITARY ENGINEERING Continued
Salt Balances in Ground Water, Aharon Meron and Harvey F. Ludwig, TR:129:667
Sewer Extension Promotes Municipal Growth, Wm. Edwin Ross and George Erganian, TR:129:142
Short-Term Air Pollution Studies, Frank A. Bell, Jr., TR:129:127
Storm Sewer Tunnel in St. Paul, John W. Bird, TR:129:523
Thermal Decomposition of Human Waste, Jimmie E. Quon and Wesley O. Pipes, TR:129:6

SCHOOLS
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837

SEDIMENT
An Analysis of Relief Bridge Scour, Emmett M. Laursen, TR:129:622
Design Waves for Littoral Drift Models, Richard Silvester, TR:129:447
Experimental Apparatus Studies Sediment Transport in Closed Conduits, Hans A. Einstein and Walter H. Graf, TR:129:585
Sediment-Transport Capability in Erodible Channels, Shieh-Wen Mao and Leonard Rice, TR:129:792
Sediment-Transporting Characteristics of Streams, Gerald A. Zernial and Emmett M. Laursen, TR:129:611
Turbulent Flow with Suspended Particles, Mikio Hino, TR:129:266

SEDIMENTATION
Analysis of Thickener Operation, Vaughn C. Behn and Jon C. Liebman, TR:129:472
Equilibrium Characteristics of Sand Beaches, Peter S. Eagleson, Bard Glenne, and John A. Dracup, TR:129:235
Sediment-Transport Capability in Erodible Channels, Shieh-Wen Mao and Leonard Rice, TR:129:792
Stabilization of Fivemile and Muddy Creeks, Carl R. Miller and Whitney M. Borland, TR:129:232
Volume-Weight of Reservoir Sediment, Herman G. Heinemann, TR:129:64

SEEPAGE
St. Anthony Falls Navigation Project, Francis E. Mullen, TR:129:52
Seepage Meters in Seepage and Recharge Studies, Herman Bouwer and R.C. Rice, TR:129:243
Seepage Under Dams, Hammad Y. Hammad, TR:129:263

SETTLEMENT
Flexibility of Clay and Cracking of Earth Dams, Gerald A. Leonards and Jagdish Narain, TR:129:767
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614

SEWAGE DISPOSAL
Activated Sludge Plant for Milwaukee, Ray D. Leary and Louis R. Howson, TR:129:519
Pre-Design Estimates in Civil Engineering Projects, William R. Park, TR:129:837
Salt Balances in Ground Water, Aharon Meron and Harvey F. Ludwig, TR:129:667

SEWAGE TREATMENT
Activated Sludge Plant for Milwaukee, Ray D. Leary and Louis R. Howson, TR:129:519
Analysis of Thickener Operation, Vaughn C. Behn and Jon C. Liebman, TR:129:472
Effect of Paddle Design on Flocculation, Neil L. Drobny, TR:129:42
Free Energy as a Parameter in Biological Treatment, James A. Servizi and Richard H. Bogan, TR:129:721
Grit Unbalance in Sewage Flow Division, Y. Yoshimi and T.E. Stelson, TR:129:344

SEWERS
Interceptor Sewer Built in a Lake, William J. Dorner and Walter J. Bushnell, TR:129:148
Manning Roughness Factors for Concrete Sewer Pipe, Israel W. Santry, TR:129:637
Sewer Extension Promotes Municipal Growth, Wm. Edwin Ross and George Erganian, TR:129:142
Unit Hydrograph Characteristics for Sewered Areas, Peter S. Eagleson, TR:129:37
Storm Sewer Tunnel in St. Paul, John W. Bird, TR:129:523

SHEAR
Analysis of Folded Plates, David Yitzhaki and Max Reiss, TR:129:383
Channel Stability in Undisturbed Cohesive Soils, Elliott M. Flaxman, TR:129:385
Effective Stress Theory of Soil Compaction, Roy E. Olson, TR:129:293
Engineering Derivation of the Navier-Stokes Equations, Hans A. Einstein, TR:129:869
Layered Systems Subjected to Surface Shears, Russell A. Westmann, TR:129:907
Shear Measurements for Rough Surfaces, Li-San Hwang and Emmett M. Laursen, TR:129:606
Shear Strength Properties of a Sodium Illite, Roy E. Olson, TR:129:291
Solution of Nonlinear Shear Lag Problems, Natarajan Krishnamurthy and James Chinn, TR:129:695

SHELLS
Analysis of Prestressed Cylindrical Shell Roofs, Ryszard Dabrowski, TR:129:673
Buckling of Circular Arches Under Nonuniform Pressure, G. Wempner and T. Ewbank, TR:129:424
Buckling of Thin Shells Under External Pressure, Anthony E. Armenàkas and George Herrmann, TR:129:347
Direct Design of Plate and Shell Structures, John F. Brotchie, TR:129:469
Limit Analysis of Cylindrical Shells, Robert E. Ball and Seng-Lip Lee, TR:129:651
Membrane Analysis of Shells, Donald L. Dean, TR:129:691
Plastic Buckling Pressure for Spherical Shells, Myron E. Lunchick, TR:129:638
Re-entry Vehicle Optimization and Synthesis Program, T.E. Hess, James C. Bailey, and H. J. Most, TR:129:887

SHELTERS
Free Fallout Shelter Design Data, Edward S. Plotkin, TR:129:539

SHIELDING
Nuclear Power in the Antarctic Environment, Philip W. Brewer, TR:129:434

SHOCK LOADING
Strong Shock Formation in Bilinear Hardening Media, Samuel Sutcliffe, TR:129:681

SHORE PROTECTION
Stabilization of Fivemile and Muddy Creeks, Carl R. Miller and Whitney M. Borland, TR:129:232
Structures for Shore Protection, Jay V. Hall, Jr., TR:129:479

SHORES
Effect of Berm on Wave Run-Up on Composite Beaches, John B. Herbich, Robert M. Sorensen and Jack H. Willenbrock, TR:129:358

SOIL MECHANICS
Allowable Bearing Capacity of Initially Bent Piles, Bengt B. Broms, TR:129:455
An Approach to Rock Mechanics, Klaus W. John, TR:129:304
Basic Experiment Into Soil-Structure Interaction, Robert V. Whitman and Ulrich Luscher, TR:129:268
Compacting a Dam Foundation by Blasting, Charles E. Hall, TR:129:823
Compression of Partially Saturated Cohesive Soils, Yoshiaki Yoshimi and Jorj O. Osterberg, TR:129:432
Dead Load Stresses and the Instability of Slopes, Lawrence E. Goodman and C.B. Brown, TR:129:89
Densification of Soils by Explosive Vibrations, Byron J. Prugh, TR:129:663
Direct-Shear Test for Effective-Strength Parameters, Hugh M. O'Neill, TR:129:276
Earthquake Resistance of Sloping Core Dams, H. Bolton Seed and Ray W. Clough, TR:129:327
Elastic Wave Velocities in Granular Soils, Bobby O. Hardin and Frank E. Richart, Jr., TR:129:352
Expansion of a Cavity in a Saturated Clay Medium, B. Ladanyi, TR:129:619
Experience with Canadian Varved Clays, Victor Milligan, L.G. Soderman, and A. Rutka, TR:129:605
Failure of a Side-Hill Highway Fill, William H. Rowan, Thomas R. Pierce, and Roger Webb, TR:129:195
Granulometric Properties of Cement Stabilized Sands, Bruce G. Hutchinson, TR:129:255
Ground Displacements from Air-Blast Loading, Stanley D. Wilson and Earl A. Sibley, TR:129:60
Hyperbolic Stress-Strain Response: Cohesive Soils, Robert L. Kondner, TR:129:47
Installation Problems with Cast-in-Place Concrete Piles, Michael Praszker, TR:129:144
Laterally Loaded Piles in a Layered Soil System, Melvin T. Davisson and Henry L. Gill, TR:129:882
Lime Stabilizes Shale Subgrade, Richard O. Berg and Charles A. Piper, Jr., TR:129:512
Load Transfer in End-Bearing Steel H-Piles, Elio D'Appolonia and James P. Romualdi, TR:129:363
Model Studies of Beams Resting on a Silt Subgrade, Aleksandar B. Vesić and Wesley H. Johnson, TR:129:410
Moving Step-Load on Half-Space of Granular Material, Hans H. Bleich and Ewald Heer, TR:129:258
Nondestructive Testing, Charles W. Britzius, TR:129:101
Placing Earth Fill for Colombia's Troneras Dam, Chung Y. Li, TR:129:133
Properties of Roadbeds, Ira B. Mullis, TR:129:755
Seepage Under Dams, Hammad Y. Hammad, TR:129:263
Shear Strength Properties of a Sodium Illite, Roy E. Olson, TR:129:291
Soil-Cement as Slope Protection for Earth Dams, Wesley G. Holtz and Fred C. Walker, TR:129:713
Stability of Deep Cuts in Clay, W.D. Liam Dinn, TR:129:215
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607
Study of Failure Envelope of Soils, T.H. Wu, A.K. Loh and L.E. Malvern, TR:129:388
Thin-Wall Tube Sampler for Soft Soils, Harry R. Lee, Jr., TR:129:481
Towers and Foundations for Project EHV, Philip A. Wild and Emerson F. Haslam, Jr., TR:129:814

SPACE EXPLORATION
Engineers in the Space Age, A.M. Minton, TR:129:189

SPECIFICATIONS
Statistical Evaulation of Concrete Strength Tests, Philip D. Cady, TR:129:910

SPILLWAYS
Experience with Prototype Energy Dissipators, Richard H. Berryhill, TR:129:678
Flood Control Operation of Reservoirs, Leo R. Beard, TR:129:623
Projected Nappes Subject to Transverse Pressure, H. Ivan Schwartz, TR:129:296
Wave Action Below Spillways, Mohamed Mokhles Abou-Seida, TR:129:80

SPILLWAYS (General)
Side-Channel Spillway Design, Harold S. Farney and Adolfs Markus, TR:129:39

STABILITY
Stability of Equilateral Triangular Plates, William A. Bradley, TR:129:416

STANDARDS
Statistical Evaluation of Concrete Strength Tests, Philip D. Cady, TR:129:910
Uniform Requirements for Property Surveys, Winfield H. Eldridge, TR:129:70

STEEL
All-Steel Abutments for Highway Bridges, John F. McDermott, TR:129:131

STEEL Continued
Behavior of Prestressed Composite Beams, Peter G. Hoadley, TR:129:630
Building Height Tripled by New Thinking Plus New Steel, J.L. Kellermann, TR:129:135
Choosing the Best Structural Fastener, Henry J. Stetina, TR:129:587
Columns in Planar Continuous Structures, Morris Ojalvo and Victor Levi, TR:129:240
Design of EHV Tower Transmission Lines, Warren O. Petersen, TR:129:17
Economies of High-Strength Steel for Reservoirs and Sandpipes, James L. Fox, TR:129:172
Effects of Cold-Straining on Structural Sheet Steels, Alexander Chajes, Stanko J. Britvec, and George Winter, TR:129:465
Elastic-Plastic Deformations of Steel Structures, Kurt H. Gerstle and Vassilios Zarboulas, TR:129:337
Galvanic Corrosion in Concrete Containing Calcium Chloride, T.E. Wright and I.H. Jenks, TR:129:829
Highest Self-Supported Tower, Robert B. Rhodes, TR:129:500
Inelastic Lateral Buckling of Beams, Theodore V. Galambos, TR:129:657
Riveted and Bolted Joints: Net Section Design, William H. Munse and Eugene Chesson, Jr., TR:129:297
Steel Column Design for Multistory Rigid Frames, Charles F. Beck and Max Zar, TR: 129:729
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601

STIFFNESS
Analysis of Arch Frames, F.P. Wiesinger, S.L. Lee, and D.L. Guell, TR:129:922
Consistent Mass Matrix for Distributed Mass Systems, John S. Archer, TR:129:648
Simplified Formulation of Stiffness Matrices, Peter M. Wright, TR:129:840

STRAINS
Effects of Cold-Straining on Structural Sheet Steels, Alexander Chajes, Stanko J. Britvec, and George Winter, TR:129:465
Fracture of Plain Concrete, Joseph Glucklich, TR:129:896
Hyperbolic Stress-Strain Response: Cohesive Soils, Robert L. Kondner, TR:129:47
Interpretation of Moire Patterns, A.J. Durelli, C.A. Sciammarella, and V.J. Parks, TR:129: 237
Moving Step-Load on Half Space of Granular Material, Hans H. Bleich and Ewald Heer, TR: 129:258
Solution of Nonlinear Shear Lag Problems, Natarajan Krishnamurthy and James Chinn, TR: 129:695
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607

STREAMS
A Moving Boatline for River Flow Measurement, Franklin C. Craig and Winchell Smith, TR:129:518
Replenishment of Aquifers Intersected by Streams, Roger J.M. De Wiest, TR:129:853
Sediment-Transporting Characteristics of Streams, Gerald A. Zernial and Emmett M. Laursen, TR:129:611
The Submerged Hydraulic Jump, N.S. Govinda Rao and N. Rajaratnam, TR:129:427

STRENGTH OF MATERIALS
Effects of Cold-Straining on Structural Sheet Steels, Alexander Chajes, Stanko J. Britvec, and George Winter, TR:129:465
Elastic Strength of Tapered Columns, Charles M. Fogel and Robert L. Ketter, TR:129:21
Structural Synthesis with Buckling Constraints, Lucien A. Schmit, Jr., and William M. Morrow, TR:129:252

STRESS AND STRAIN
Analysis of Free Straight Multiflight Staircases, Avinada Siev, TR:129:271
Basic Experiment Into Soil-Structure Interaction, Robert V. Whitman and Ulrich Luscher, TR:129:268
Direct-Shear Test for Effective-Strength Parameters, Hugh M. O'Neill, TR:129:276

STRESSES
Boundary Shear Stresses in Curved Trapezoidal Channels, Arthur T. Ippen and Phillip A. Drinker, TR:129:55
Buckling of Thin Shells Under External Pressure, Anthony E. Armenàkas and George Herrmann, TR:129:347
Dead Load Stresses and the Instability of Slopes, Lawrence E. Goodman and C.B. Brown, TR:129:89
Engineering Derivation of the Navier-Stokes Equations, Hans A. Einstein, TR:129:869
Fracture of Plain Concrete, Joseph Glucklich, TR:129:896
Hyperbolic Stress-Strain Response: Cohesive Soils, Robert L. Kondner, TR:129:47
Interpretation of Moire Patterns, A.J. Durelli, C.A. Sciammarella, and V.J. Parks, TR:129: 237
Layered Systems Subjected to Surface Shears, Russell A. Westmann, TR:129:907
Limit Analysis of Cylindrical Shells, Robert E. Ball and Seng-Lip Lee, TR:129:651
Matrix Derivation of the Folded Plate Equations, J.L. Meek, TR:129:759
Membrane Analysis of Shells, Donald L. Dean, TR:129:691
Plane Stress Analysis, Caleb W. McCormick, TR:129:856
Rigid-Plastic Analysis of General Structures, J.B. Martin, TR:129:62
Shear Strength Properties of a Sodium Illite, Roy E. Olson, TR:129:291
Solution of Nonlinear Shear Lag Problems, Natarajan Krishnamurthy and James Chinn, TR:129:695
Stress-Dilatancy, Earth Pressures, and Slopes, P.W. Rowe, TR:129:607
Stresses in a Pressurized Box, H.D. Conway, TR:129:361
Strong Shock Formation in Bilinear Hardening Media, Samuel Sutcliffe, TR:129:681
Transverse Normal Stress in Beams, Jerome L. Sackman, TR:129:646
Vibration of Circular Plates at Large Amplitudes, Thein Wah, TR:129:429

STRUCTURAL DYNAMICS
Dynamic Behavior of Supercritically Loaded Struts, George W. Housner and Wai Keung Tso, TR:129:603

STRUCTURAL ENGINEERING
Analysis and Design of Struts with Tension Ties, Kuang-Han Chu and Sigmon S. Berge, TR:129:377
Analysis of Arch Frames, F.P. Wiesinger, S.L. Lee, and D.L. Guell, TR:129:922
Analysis of Free Straight Multiflight Staircases, Avinada Siev, TR:129:271
Analysis of Large Movable Structures, Herbert Rothman and Philip Mason, TR:129:889
Analysis of Nonlinear Structures, John E. Goldberg and Ralph M. Richard, TR:129:425
Analysis of Prestressed Cylindrical Shell Roofs, Ryszard Dabrowski, TR:129:673
Analysis of Rigid Frames by Difference Equations, Hsien-San Tsang, TR:129:75
Applications of Topology in Structural Analysis, William R. Spillers, TR:129:393
Beam Analogy for the Solution of Vierendeel Trusses, Bernardo Deschapelles, TR:129:684
Behavior of Prestressed Composite Beams, Peter G. Hoadley, TR:129:630
Buckling for Stepped Columns with Rotated Ends, Robert E. Sennett, III, and Sidney Shore, TR:129:50
Buffeting of a Suspension Bridge by Storm Winds, Alan Garnett Davenport, TR:129:306
Building Height Tripled by New Thinking Plus New Steel, J.L. Kellermann, TR:129:135
Choosing the Best Structural Fastener, Henry J. Stetina, TR:129:587
Columns in Planar Continuous Structures, Morris Ojalvo and Victor Levi, TR:129:240
Computer Study of Dynamic Behavior of Piling, Charles H. Samson, Jr., Teddy J. Hirsch, and Lee L. Lowery, Jr., TR:129:764
Consistent Mass Matrix for Distributed Mass Systems, John S. Archer, TR:129:648
Creep Buckling of Reinforced Concrete Columns, Samuel Mauch and Myle J. Holley, TR:129:903
Deflection and Slope of Beams with Varying I, Otakar Ondra, TR:129:741
Design of Composite Beams for Highway Bridges, Konstantin Ketchek, TR:129:492
Determination of Elastic Critical Loads, Leonard K. Stevens and Lewis C. Schmidt, TR:120:808
Detroit's Automated Post Office--Nation's Second Largest, Victor F. Leabu, TR:129:137
Direct Design of Plate and Shell Structures, John F. Brotchie, TR:129:469
Distribution of Structural Response to Earthquakes, Emilio Rosenblueth and Jorge I. Bustamante, TR:129:413
Dynamic Bending of Elastic Columns, Herbert R. Bailey, TR:129:467
Dynamic Flexibility Matrix Analysis of Frames, Kenneth W. Levien and Billy J. Hartz, TR:129:890
Dynamic Nonlinear Response of Reinforced Concrete Arches, Vijay N. Gupchup and John M. Biggs, TR:129:826
Dynamic Pressure of Granular Material in Deep Bins, Alexander M. Turitzin, TR:129:407
Dynamic Response of Lattice-Type Structures, Bruce S. Berger and Sidney Shore, TR:129:96
Dynamics of a Large Steerable Radio Telescope Antenna, William Weaver, Jr., and Thomas R. Kane, TR:129:686
Economic Advantages of Ultimate-Strength Design, Thomas W. Taylor, TR:129:591
Effect of Structure and Foundation Interaction, Daniel L. Lycan and Nathan M. Newmark, TR:129:35
Effects of Cold-Straining on Structural Sheet Steels, Alexander Chajes, Stanko J. Britvec, and George Winter, TR:129:465
Elastic-Plastic Deformations of Steel Structures, Kurt H. Gerstle and Vassilios Zarboulas, TR:129:337
Elastic Strength of Tapered Columns, Charles M. Fogel and Robert L. Ketter, TR:129:21
Engineering Approach to Information Processing, Walter M. Carlson, TR:129:430
Engineers as Real Estate Developers, Paul Rogers and George A. Kennedy, TR:129:201
Fire Protection for Aluminum Alloy Structural Shapes, J.G. Kaufman and Richard C. Kasser, TR:129:153
Flexibility Method of Coupling Redundant Complex Structures, Claus J. Meissner and Robert S. Levy, TR:129:901
Highest Self-Supported Tower, Robert B. Rhodes, TR:129:500
Inelastic Lateral Buckling of Beams, Theodore V. Galambos, TR:129:657
Integrated Structural Steel Design Program, Alfred H. Palmer, Kosmas Balkus, Charles A. Veldon, and Herbert T. Blomquist, TR:129:761
Iterative Method in Frame Analysis, Paul Lustgarten, TR:129:868
Large Capacity Multistory Frame Analysis Programs, Ray W. Clough, Edward L. Wilson, and Ian P. King, TR:129:865
Limit Analysis of Cylindrical Shells, Robert E. Ball and Seng-Lip Lee, TR:129:651
Man-Machine Communications in Civil Engineering, Charles L. Miller, TR:129:919
Matrix Derivation of the Folded Plate Equations, J.L. Meek, TR:129:759
Matrix Solution of Force Relaxation Method, Chuan C. Feng, TR:129:632
Metallic Dome-Structure Systems, Shu-t'ien Li, TR:129:401
Method for Plastic Design of Frames, George J. Megarefs and Philip G. Hodge, Jr., TR:129:260
Natural Periods of Vibration of Buildings, G.W. Housner and A.G. Brady, TR:129:894
Network Analogy for Linear Structures, William R. Spillers, TR:129:804
Network-Topological Formulation of Structural Analysis, Steven J. Fenves and Franklin H. Branin, Jr., TR:129:699
New York World's Fair Building Trends, William Whipple, Jr., TR:129:182
Nondestructive Testing, Charles W. Britzius, TR:129:101
Opening in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614
Optimum Solution Techniques for Finite-Difference Equations, Richard N. White, TR:129:444
Parameters in the Distribution of Fatigue Life, E.J. Gumbel, TR:129:612

STRUCTURAL ENGINEERING Continued
Parking Garage Extended to Meet Growth of Downtown Houston, Arnoldo Longoria, TR:129:156
Passive Analog Computers for Structural Analysis, Richard H. MacNeal, TR:129:825
Plane Stress Analysis, Caleb W. McCormick, TR:129:856
Re-entry Vehicle Optimization and Synthesis Program, T.E. Hess, James C. Bailey, and H.J. Most, TR:129:887
Reliability Framework for Structural Design, Howard L. Leve, TR:129:771
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Charles W. Lewitt, Eugene Chesson, Jr., and William H. Munse, TR:129:355
Sault Ste. Marie International Bridge--Design and Construction, Carl H. Gronquist, TR:129:180
Simplified Formulation of Stiffness Matrices, Peter M. Wright, TR:129:840
Solution of Nonlinear Shear Lag Problems, Natarajan Krishnamurthy and James Chinn, TR:129:695
Space Frame Analysis by Matrices and Computer, Kurt Eisemann, Lin Woo, and Saul Namyet, TR:129:609
Stability of Frames Under Primary Bending Moments, Le-Wu Lu, TR:129:913
Stability of Space Frames by Computer Analysis, John D. Renton, TR:129:225
Statical Indeterminacy and Stability of Structures, Frank L. DiMaggio, TR:129:329
Steel Column Design for Multistory Rigid Frames, Charles F. Beck and Max Zar, TR:129:729
Stresses in a Pressurized Box, H.D. Conway, TR:129:361
Structural Analysis of Solids, Robert J. Melosh, TR:129:397
Structural Synthesis and Design Parameter Hierarchy, Lucien A. Schmit, Jr., and Robert H. Mallett, TR:129:441
Structural Synthesis with Buckling Constraints, Lucien A. Schmit, Jr., and William M. Morrow, TR:129:252
Transient Response of Nonlinear Systems, Patrick F. Cunniff, TR:129:279
Ultimate Load of H-Columns Under Biaxial Bending, Charles Birnstiel and James Michalos, TR:129:379
Use of Critical Path Techniques, Charles W. Zahler, TR:129:436
Vibration of Circular Plates at Large Amplitudes, Thein Wah, TR:129:429
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601

SUBDIVISIONS
Land Surveying and Land Registration, John G. McEntyre and Arthur J. McNair, TR:129:877

SURVEYING
Cadastral Surveying in Alaska, Frankin K. Van Zandt, TR:129:884
Chesapeake Bay Bridge-Tunnel Survey, Percy Z. Michener and Earl O. Heaton, TR:129:219
Civil Requirements for Topographic Maps, Robert H. Lyddan, TR:129:845
Education Requirements in Surveying and Geodesy, Carl I. Aslakson, TR:129:91
Electronic Surveying: Accuracy of Electronic Positioning Systems, Henry W. Bigelow, TR:129:892
Electronic Surveying: Accuracy of Tellurometer over Short Distances, Simo H. Laurila, TR:129:711
Electronic Surveying: Electronic Distance Measurements, A.E. Harrison, TR:129:708
Error Problems in Aerial Photogrammetry, Sumner B. Irish, TR:129:855
First Peace Corps Surveyors and Engineers, Russell C. Brinker, TR:129:73
Geodesy and the Torsion Balance, Ivan I. Mueller, TR:129:463
Geodetic Engineering Education in West Germany, Milton O. Schmidt, TR:129:87
Land Surveying and Land Registration, John G. McEntyre and Arthur J. McNair, TR:129:877
Measuring the Precision of a Level, Sumner B. Irish, TR:129:917
Military Requirements for Topographic Maps, Frederick O. Diercks, TR:129:375
Orthonormal Equations for Surveying Adjustment, Hsuan Loh Su, TR:129:879
Photogrammetric Determination of Azimuths, Michael S. Tavenner and Paul B. Swenson, TR:129:921
Photogrammetric Engineering and Reservoir Planning, Pliny Gale, TR:129:880
Photogrammetry in Chile, Staff of Proyecto Aerofotogrametrico-Chile of the Organization of American States, TR:129:211
Problems in Property Surveys and Right-of-Way Maps, Frank Bonacci, TR:129:449
Role of Surveying in Civil Engineering Education, Milton O. Schmidt, TR:129:93
Scintillation and the Surveyor, Lee D. Miller, TR:129:688
Solar-Altitude Azimuths, Paul Hartman, TR:129:391
Strength of Figure Equation in Triangulation, Sumner B. Irish, TR:129:886
Uniform Requirements for Property Surveys, Winfield H. Eldridge, TR:129:70

TANKS
Economies of High-Strength Steel for Reservoirs and Sandpipes, James L. Fox, TR:129:172

TESTING
Accuracy of Current Meter Measurements, Rolland W. Carter and Irving E. Anderson, TR:129:668
Boundary Shear Stresses in Curved Trapezoidal Channels, Arthur T. Ippen and Phillip A. Drinker, TR:129:55
Dynamic Pressure of Granular Material in Deep Bins, Alexander M. Turitzin, TR:129:407
Effect of Berm on Wave Run-Up on Composite Beaches, John B. Herbich, Robert M. Sorensen, and Jack H. Willenbrock, TR:129:358
Effect of Paddle Design on Flocculation, Neil L. Drobny, TR:129:42
Fluorescent Tracers for Dispersion Measurements, Donald L. Feuerstein and Robert E. Selleck, TR:129:438
Granulometric Properties of Cement Stabilized Sands, Bruce G. Hutchinson, TR:129:255

TESTING Continued
Hydraulic Model Tests of Estuarial Waste Dispersion, Richard L. O'Connell and Carl M. Walter, TR:129:719
St. Anthony Falls Navigation Project, Francis E. Mullen, TR:129:52
Sliding of Composite-Type Breakwaters b Breaking Waves, Shoshichiro Nagai, TR:129:370
Statistical Evaulation of Concrete Strength Tests, Philip D. Cady, TR:129:910
Study of Failure Envelope of Soils, T.H. Wu, A.K. Loh and L.E. Malvern, TR:129:388
Test of Concrete Pavements on Crushed Stone, L.D. Childs and Joe W. Kapernick, TR:129:777
The Submerged Hydraulic Jump, N.S. Govinda Rao and N. Rajaratnam, TR:129:427
Thin-Wall Tube Sampler for Soft Soils, Harry R. Lee, Jr., TR:129:481

TESTS AND TESTING
Basic Experiment Into Soil-Structure Interaction, Robert V. Whitman and Ulrich Luscher, TR:129:268
An Approach to Rock Mechanics, Klaus W. John, TR:129:304
Direct-Shear Test for Effective-Strength Parameters, Hugh M. O'Neill, TR:129:276
Uplift Resistance of Transmission Tower Footings, Edward A. Turner, TR:129:288

TIMBER
Reconstructing a Covered Timber Bridge, Albert S. Salkowski, TR:129:531

TOPOLOGY
Applications of Topology in Structural Analysis, William R. Spillers, TR:129:393
Network Analogy for Linear Structures, William R. Spillers, TR:129:804
Network-Topological Formulation of Structural Analysis, Steven J. Fenves and Franklin H. Branin, Jr., TR:129:699

TOWERS
Analysis of Large Movable Structures, Herbert Rothman and Philip Mason, TR:129:889
Highest Self-Supported Tower, Robert B. Rhodes, TR:129:500
Matrix Solution of Force Relaxation Method, Chuan C. Feng, TR:129:632
Towers and Foundations for Project EHV, Philip A. Wild and Emerson F. Haslam, Jr., TR:129:814
Uplift Resistance of Transmission Tower Footings, Edward A. Turner, TR:129:288

TRACERS
Fluorescent Tracers for Dispersion Measurements, Donald L. Feuerstein and Robert E. Selleck, TR:129:438

TRAFFIC
Analytical Methods in Transportation: Operations Research in Tunnel Traffic Control, Leslie C. Edie, TR:129:899
Analytical Methods in Transportation: Systems Analysis for Arterial Street Operation, Charles Pinnel and Gilbert T. Satterly, TR:129:846
Distribution of Work Trips in Toronto, Karl Heinz Dieter, TR:129:32
Interdependence of Transportation and City Planning, William S. Pollard, Jr., TR:129:891
Predicting the Modal Split in Pittsburgh, Louis E. Keefer, TR:129:745
Transportation Planning Re-examined, William S. Pollard, Jr., TR:129:863

TRANSPORTATION
An Expression for Bed-Load Transportation, M. Selim Yalin, TR:129:665
Capacity of Urban Transportation Modes, Walter S. Rainville and Wolfgang S. Homburger, TR:129:747
Distribution of Work Trips in Toronto, Karl Heinz Dieter, TR:129:32
Helicopter Performance and Heliport Design, Kenneth K. Wilde, TR:129:811
Interdependence of Transportation and City Planning, William S. Pollard, Jr., TR:129:891
Pan American Passenger Terminal at Idlewild Airport, Walter Prokosch, TR:129:313
Predicting the Modal Split in Pittsburgh, Louis E. Keefer, TR:129:745
Principles of a Sound Transportation Policy, TR:129:484
Rail Transit in the Highway Median--Yes or No? Joseph Barnett, TR:129:107
Transportation Planning Re-examined, William S. Pollard, Jr., TR:129:863
Urban Transportation Tasks of the Future, Wilbur S. Smith, TR:129:682

TRANSIT SYSTEMS
Capacity of Urban Transportation Modes, Walter S. Rainville, Jr., and Wolfgang S. Homburger, TR:129:747
Predicting the Modal Split in Pittsburgh, Louis E. Keefer, TR:129:745

TRUSSES
Beam Analogy for the Solution of Vierendeel Trusses, Bernardo Deschapelles, TR:129:684
Matrix Solution of Force Relaxation Method, Chuan C. Feng, TR:129:632
Riveted and Bolted Joints: Fatigue of Bolted Structural Connections, Eugene Chesson, Jr., and William H. Munse, TR:129:458
Structural Synthesis with Buckling Constraints, Lucien A. Schmit, Jr., and William M. Morrow, TR:129:252

TUNNELS
Analytical Methods in Transportation: Operations Research in Tunnel Traffic Control, Leslie C. Edie, TR:129:899
Chesapeake Bay Bridge-Tunnel Project, a Series: Bridge and Trestle Construction, John W. Fowler, TR:129:565
Chesapeake Bay Bridge-Tunnel Project, a Series: Engineering Design, Leif J. Sverdrup, TR:129:561
Chesapeake Bay Bridge-Tunnel Project, a Series: Two Tunnels and Four Islands, Joseph Peraino, TR:129:563
Chesapeake Bay Bridge-Tunnel Survey, Percy Z. Michener and Earl O. Heaton, TR:129:219
Foundation Problems on the Second Elizabeth River Tunnel, George J. Murphy and Isaac W. Tarshansky, TR:129:488

TUNNELS Continued
Freezing Aids Shaft Sinking for a Water Tunnel Under New York Harbor, George C. Stewart, William K. Gildersleeve, Stanley Jampole, and John E. Connolly, TR:129:177
Machine Tunneling in Tasmania, Henry H. Thomas, TR:129:150
Pomme de Terre Dam of Earth and Rockfill, Louis G. Elser and Dean E. Schuster, TR:129:246
Storm Sewer Tunnel in St. Paul, John W. Bird, TR:129:523
Tunnel Driving on Three Contracts for Relocation of Western Pacific Railroad Above Oroville Dam in California, Harold E. Russell, TR:129:125

TURBINES
Symposium on Pumped Storage: Development of Reversible Pump-Turbines, M. Barikevitch, D. Hartland, and R.A. Strubb, TR:129:705

TURBULENCE
Flow Characterics of Axisymmetric Expansions, M.C. Chaturvedi, TR:129:849
Flow of Clay Water Suspensions, Charles D.D. Howard, TR:129:859
Turbulent Flow in Rectangular Ducts, Hans J. Leutheusser, TR:129:659
Turbulent Flow with Suspended Particles, Mikio Hino, TR:129:266

UTILITIES
Utilities for the Divided City of Berlin, Gustav J. Requardt, TR:129:115

VALVES
Valve Stroking to Control Water Hammer, Victor L. Streeter, TR:129:322

VEHICLES
Re-entry Vehicle Optimization and Synthesis Program, T.E. Hess, James C. Bailey, and H.J. Most, TR:129:887

VELOCITY
Accuracy of Current Meter Measurements, Rolland W. Carter and Irving E. Anderson, TR:129:668
Elastic Wave Velocities in Granular Soils, Bobby O. Hardin and Frank E. Richart, Jr., TR:129:352
Shear Measurements for Rough Surfaces, Li-San Hwang and Emmett M. Laursen, TR:129:606
The Submerged Hydraulic Jump, N.S. Govinda Rao and N. Rajaratnam, TR:129:427

VIBRATION
Buffeting of a Suspension Bridge by Storm Winds, Alan Garnett Davenport, TR:129:306
Consistent Mass Matrix for Distributed Mass Systems, John S. Archer, TR:129:648
Damping in Discrete Linear Elastic Systems, Donald A. DaDeppo, TR:129:754
Densification of Soils by Explosive Vibrations, Byron J. Prugh, TR:129:663
Dynamics of a Large Steerable Radio Telescope Antenna, William Weaver, Jr., and Thomas R. Kane, TR:129:686
Groups of Vertical Cylinders Oscillating in Water, Alan D.K. Laird and R.P. Warren, TR:129:311
Natural Periods of Vibration of Buildings, G. W. Housner and A.G. Brady, TR:129:894
Natural Vibrations of Partially Clamped Plates, Muneaki Kurata and Hirokazu Okamura, TR:129:299
Vibration of Circular Plates at Large Amplitudes, Thein Wah, TR:129:429
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601

VISCOSITY
Damping in Discrete Linear Elastic Systems, Donald A. DaDeppo, TR:129:754
Engineering Derivation of the Navier-Stokes Equations, Hans A. Einstein, TR:129:869
Flow of Clay Water Suspensions, Charles D.D. Howard, TR:129:859

WALLS
Openings in Masonry Walls on Settling Supports, S. Rosenhaupt and G. Mueller, TR:129:614
Sliding of Composite-Type Breadwaters by Breaking Waves, Shoshichiro Nagai, TR:129:370

WASTE DISPOSAL
Deep Injection Disposal Well for Liquid Toxic Waste, O.E. Mechem and J.H. Garrett, TR:129:800
Hydraulic Model Tests of Estuarial Waste Dispersion, Richard L. O'Connell and Carl M. Walter, TR:129:719
Salt Balances in Ground Water, Aharon Meron and Harvey F. Ludwig, TR:129:667
Thermal Decomposition of Human Waste, Jimmie E. Quon and Wesley O. Pipes, TR:129:6

WASTE TREATMENT
More Municipal Waste Treatment Works Needed, David H. Howells, TR:129:525

WATER CONSERVATION
Perspective on National Water Resources Planning, Theodore M. Schad, TR:129:67

WATER CONSUMPTION
Unique Consumptive Use Curve Related to Irrigation Practice, Vaughn E. Hansen, TR:129:654

WATER DISTRIBUTION
Subsurface Water Distribution in Surface Irrigation, Ernest T. Smerdon, TR:129:324
Thin Wall Pipe in Distribution Systems, Jack W. Pierce, TR:129:593
Water Distribution from Medium Pressure Sprinklers, Ido Seginer, TR:129:332

WATER FLOW
Accuracy of Current Meter Measurements, Rolland W. Carter and Irving E. Anderson, TR:129:668
Atmospheric Moisture-Precipitation Relations, Floyd A. Huff, TR:129:757
Boundary Flow Along a Circular Cylinder, Robert O. Reid and Basil W. Wilson, TR:129:334

WATER FLOW Continued
Extension of Rating Curves by Field Surveys, Walter T. Sittner, TR:129:286
Flow Retardance by Channel Weeds and Their Control, John C. Stephens, R.D. Blackburn, D.E. Seaman, and L.W. Weldon, TR:129:724
Groups of Vertical Cylinders Oscillating in Water, Alan D.K. Laird and R.P. Warren, TR: 129:311
Seepage Under Dams, Hammad Y. Hammad, TR:129:263
Solving the Equations of Uniform Flow, William F. Pickard, TR:129:769
Spatially Varied Flow from Controlled Rainfall, Dah-Cheng Woo and Ernest F. Brater, TR:129: 319
Valve Stroking to Control Water Hammer, Victor L. Streeter, TR:129:322

WATER HAMMER
Valve Stroking to Control Water Hammer, Victor L. Streeter, TR:129:322

WATER POLLUTION
Are Our Criteria for Bathing-Water Pollution Valid? David L. Muss, TR:129:547
Quality and Significance of Irrigation Return Flow, Robert O. Sylvester and Robert W. Seabloom, TR:129:460

WATER RESOURCES
Atmospheric Moisture-Precipitation Relations, Floyd A. Huff, TR:129:757
Conjunctive Operation of Dams and Aquifers, Nathan Buras, TR:129:789
Electronic Computers in Watershed Research, L.L. Kelly, TR:129:634
Ground Water in Texas, Mervin L. Klug, TR:129:617
Salt Balances in Ground Water, Aharon Meron and Harvey F. Ludwig, TR:129:667
Water Supplies for Titan ICBM Bases, Frederick J. Matthies, TR:129:283

WATER SUPPLY
Freezing Aids Shaft Sinking for a Water Tunnel Under New York Harbor, George C. Stewart, William K. Gildersleeve, Stanley Jampole, and John E. Connolly, TR:129:177
Nonsteady Flow for Wells with Decreasing Discharge, Mahmoud A. Abu-Zied and Verne H. Scott, TR:129:883
100 MGD Added to Milwaukee's Water Supply, Herbert M. Ihlong and Donald P. Proudfit, TR:129:509
100-Mile Pipeline Brings Water to Oklahoma City, Herman E. Smith and Lee B. Washbourne, TR:129:529
Photogrammetry to Locate Water, Alfred O. Quinn, TR:129:501
Project Yield by a Probability Method, W. Don Maughan and Ray Y. Kawano, TR:129:734
Salt Balances in Ground Water, Aharon Meron and Harvey F. Ludwig, TR:129:667

WATER SUPPLY (General)
Economics of Urban Drainage Design, William J. Bauer, TR:129:335
Perspective on National Water Resources Planning, Theodore M. Schad, TR:129:67
Water Supplies for Titan ICBM Bases, Frederick J. Matthies, TR:129:283

WATER TREATMENT
Effect of Paddle Design on Flocculation, Neil L. Drobny, TR:129:42
Functional Design of Rapid Sand Filters, H.E. Hudson, JR., TR:129:229
Kinetics of Adsorption on Carbon from Solution, Walter J. Weber, Jr., and J. Caroll Morris, TR:129:316
Mechanism of Coagulation in Water Treatment, S. Mackrle, TR:129:821
More Municipal Waste Treatment Works Needed, David H. Howells, TR:129:525

100 MGD Added to Milwaukee's Water Supply, Herbert M. Ihlong and Donald P. Proudfit, TR:129:509

WATERWAYS
Design Waves for Littoral Drift Models, Richard Silvester, TR:129:447
Model for River Regulation, Lewis L. Sheerar, TR:129:847

WATERWAYS (General)
Evaluation of Mooring Forces, Shu-t'ien Li, TR:129:365
Offshore Mooring Island for Supertankers, Virgil Blancato and Joseph H. Finger, TR:129: 301

WAVES
Design Waves for Littoral Drift Models, Richard Silvester, TR:129:447
Dynamic Response of Elastic-Viscous-Plastic Columns, Cheng Y. Yang, Robert J. Hansen, and Kenneth F. Reinschmidt, TR:129:83
Effect of Berm on Wave Run-Up on Composite Beaches, John B. Herbich, Robert M. Sorensen, and Jack H. Willenbrock, TR:129:358
Equilibrium Characteristics of Sand Beaches, Peter S. Eagleson, Bard Glenne, and John A. Dracup, TR:129:235
Evaluation of Mooring Forces, Shu-t'ien Li, TR:129:365
Flood Waves in Prismatic Channels, Francis M. Henderson, TR:129:738
Groups of Vertical Cylinders Oscillating in Water, Alan D.K. Laird and R.P. Warren, TR:129:311
Investigation of the Statistics of Wave Heights, R.C. Goodknight and T.L. Russell, TR:129:805
Sliding of Composite-Type Breakwaters by Breaking Waves, Shoshichiro Nagai, TR:129:370
Strong Shock Formation in Bilinear Hardening Media, Samuel Sutcliffe, TR:129:681
Wave Action Below Spillways, Mohamed Mokhles Abou-Seida, TR:129:80

WELDING
Building Height Tripled by New Thinking Plus New Steel, J.L. Kellermann, TR:129:135
Choosing the Best Structural Fastener, Henry J. Stetina, TR:129:587
The AWS Specifications for Welded Highway and Railway Bridges, La Motte Grover, TR:129:573

WELLS
Deep Injection Disposal Well for Liquid Toxic Waste, O.E. Mechem and J.H. Garrett, TR:129:800
Nonsteady Flow for Wells with Decreasing Discharge, Mahmoud A. Abu-Zied and Verne H. Scott, TR:129:883
Radial Collector Wells Adjacent to the River Bank, Miloje Milojevic, TR:129:786
Replenishment of Awuifers Intersected by Streams, Roger J. M. De Wiest, TR:129:853

WIND
Buffeting of a Suspension Bridge by Storm Winds, Alan Garnett Davenport, TR:129:306
Effects of Tornados on Buildings, Frank E. Burkett, TR:129:120
Houston's Jetero Airport: Location and Configuration, Frank H. Newnam, Jr., TR:129:420
Vibrations of Steel-Lined Concrete Chimneys, Wadi S. Rumman, TR:129:601

ZONING
An Appraisal of Zoning as a Tool of City Planning, Richard F. Babcock, TR:129:636
Houston's Jetero Airport: Location and Configuration, Frank H. Newnam, Jr., TR:129:420
Modern Flood-Plain Zoning Ordinance Adopted by Iowa City, Joseph W. Howe, TR:129:160

AUTHOR INDEX
{including Memoirs of deceased menbers}

ABOU-SEIDA, MOHAMED MOKHLES
Wave Action Below Spillways, TR:129:80

ABU-ZIED, MAHMOUD A.
Nonsteady Flow for Wells with Decreasing Discharge, with Verne H. Scott, TR:129:883

AHLBORN, GALE
Effect of Gradient on Jet Transport Runway Lengths, with Robert Horonjeff, TR:129:381

AMRHEIN, JAMES E.
